JOURNAL OF AIRCRAFT
Vol. 50, No. 6, November–December 2013

2013 *Journal of Aircraft* Index

How to Use the Index

In the Subject Index, pages 1944–1951, each technical paper is listed under a maximum of three appropriate headings. Note the locating number in boldface type preceding each paper title, and use that number to find the paper in the Chronological Index. The Author Index, pages 1952–1954, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 1955–1962, also lists all papers by their locating numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 2010, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

DOI: 10.2514/1.C032642

AIRCRAFT TECHNOLOGY, CONVENTIONAL, STOL/VTOL

C13-028 Experimental Study of a Ground Vortex: The Effect of the Crossflow Velocity

C13-094 Determination of Fracture Parameters for Multiple Edge Cracks of a Finite Plate

C13-127 Lifting-Line Predictions for Induced Drag and Lift in Ground Effect

Aerodynamics

C13-001 Lift Enhancement by Plasma Actuators at Low Reynolds Numbers

C13-006 Active Flow-Separation Control on a High-Lift Wing-Body Configuration

C13-014 Investigation of Trailing-Edge Flap Gap Effects on Rotor Performance Using High-Fidelity Analysis

C13-015 Three-Dimensional Laminar-Separation Bubble on a Cambered Thin Wing at Low Reynolds Numbers

C13-018 Large-Eddy Simulation of Low-Reynolds-Number Flow Over Thick and Thin NACA Airfoils

C13-019 Experimental Investigation of Parachute Canopies with Rectangular Parallelepiped Geometries

C13-020 Low-Reynolds-Number Aerodynamic Performances of the NACA 0012 and Selig–Donovan 7003 Airfoils

C13-025 Active Flow Control of a Boundary Layer-Ingesting Serpentine Inlet Diffuser

C13-026 High Angle of Attack Parameter Estimation of Cascaded Fins Using Neural Network

C13-027 Empirically Derived Biplane Lift as a Function of Gap and Stagger

C13-029 On the Transformation of the Angle of Attack for Supersonic Similarity Rules

C13-031 Effect of Rapid-Prototyped Airfoil Finish on Loading at Low Reynolds Numbers

C13-035 Unsteady Momentum Source Method for Efficient Simulation of Rotor Aerodynamics

C13-038 Analysis of the Effects of Streamwise Lift Distribution on Sonic Boom Signature

C13-041 Aerodynamic Characteristics of Canard-Forward Swept Wing Aircraft Configurations

C13-044 Impaired Aircraft Performance Envelope Estimation

C13-045 Efficient Computation of Unsteady Aerodynamic Loads Using Computational-Fluid-Dynamics Linearized Methods

C13-046 Experimental Investigation of Wing-Tip Devices on the Reduction of Induced Drag

C13-052 Implementation of a Continuous-Inextensible-Surface Piezocomposite Airfoil

C13-053 Optimization of Wind Turbine Blade Airfoils Using a Multi-Objective Genetic Algorithm

C13-056 Multi-Degree-of-Freedom Wind-Tunnel Maneuver Rig for Dynamic Simulation and Aerodynamic Model Identification

C13-059 Aerodynamic Characteristics of a Pitching Airfoil Through Pressure-Distortion Correction in Pneumatic Tubing

C13-063 Aerodynamic Impact of Aspect Ratio at Low Reynolds Number

C13-065 Study of Gap Physics of Airfoils with Unsteady Flaps

C13-069 Turbulence Measurements in a Short Take-Off Vertical-Landing Fountain

C13-071 Effect of the Model-Sidewall Connection for a Static Airfoil Experiment

C13-073 Linear Frequency Domain and Harmonic Balance Predictions of Dynamic Derivatives

C13-079 Numerical Assessment of Pneumatic Devices on the Wing/Fuselage Junction of a Tiltrotor

C13-080 Experimental Evaluation of a Self-Contained Circulation-Control Wing

C13-081 Refined Tetrahedral Meshes with Mach Cone Aligned Prisms for Sonic Boom Analysis

C13-082 Spanwise Variation in Circulation and Drag of Wings at Moderate Reynolds Number

C13-083 Shape Optimization of Nonplanar Lifting Surfaces and Planar–Nonplanar Break Points

C13-090 Mean Loads from Wind-Tunnel Turbulence on Low-Aspect-Ratio Flat Plates

C13-091 Multi-Stepping Ice Prediction on Cylinders and Other Relevant Geometries

C13-093 Tentative Study of Passenger Comfort During Formation Flight Within Atmospheric Turbulence

C13-097 Lift Distributions for Minimum Induced Drag with Generalized Bending Moment Constraints

C13-099 Planform Effects for Low-Reynolds-Number Thin Wings with Positive and Reflex Cambers

C13-101 Development of Thick Airfoils for Wind Turbines

C13-103 Computational Investigation of Unsteadiness in Propeller Wake–Wing Interactions

C13-113 Understanding Micro Air Vehicle Flapping-Wing Aerodynamics Using Force and Flowfield Measurements

C13-115 Comparison of Octree and Omni-Tree Cartesian Grid for Civil-Plane High-Lift Model Simulations

C13-117 System Identification for Small, Low-Cost, Fixed-Wing Unmanned Aircraft

C13-119 T-38 Wind-Tunnel Data Quality Assurance Based on Testing of a Standard Model

C13-123 Automatic Embedding of Potential Flow Wake Surfaces in Generic Monolithic Unstructured Meshes

C13-125 Mach and Reynolds Number Dependencies of the Stall Behavior of High-Lift Wing-Sections

C13-126 Effect of Aspect Ratio on Gurney-Flap Performance

C13-127 Lifting-Line Predictions for Induced Drag and Lift in Ground Effect

C13-130 Quasi-Steady Convergence of Multistep Navier–Stokes Icing Simulations

C13-130 Quasi-Steady Convergence of Multistep Navier–Stokes Icing Simulations

C13-132 Experimental Investigation into the Effect of Gurney Flaps on Various Airfoils

C13-137 Leading-Edge Vortex Structure over Multiple Revolutions of a Rotating Wing

C13-138 Effectiveness of Wing Root Gap for Stall Control

C13-139 Positive and Negative Spanwise Flow Development on an Insect-Like Rotating Wing

C13-143 Efficient Decoupled Hydrodynamic and Aerodynamic Analysis of Amphibious Aircraft Water Takeoff Process

C13-147 Dynamic Soaring of Sailplanes over Open Fields

C13-148 Stability-Constrained Aerodynamic Shape Optimization of Flying Wings

C13-156 Correlation-Based Transition Transport Modeling for Three-Dimensional Aerodynamic Configurations

C13-163 Drag Prediction Workshop 4 Results Using Different Grids Including Near-Field/Far-Field Drag Analysis

C13-164 Simulation of Flowfield Around a Ram-Air Personnel Parachute Canopy

C13-166 Computations from the Fourth Drag Prediction Workshop Using the Edge Solver

C13-176 Experimental and Computational Modeling of the Kinematics and Aerodynamics of Flapping Wing

C13-177 Nonlinear Aeroelastic Formulation and Postflutter Analysis of Flexible High-Aspect-Ratio Wings

C13-181 Experimental Characterization of Lift on a Rigid Flapping Wing

C13-182 Far-Field Drag Decomposition Applied to the Drag Prediction Workshop 5 Cases

C13-184 Investigation of Poststall Pitch Oscillations of an Aircraft Wind-Tunnel Model

C13-185 Bow Wave Effect in Aerial Refueling: Computational Analysis and Modeling

C13-188 Scaling of Lift Degradation Due to Antiicing Fluids

Aeroelasticity and Aeroservoelasticity

C13-005 Aeroelastic Wind-Tunnel Test for Aerodynamic Uncertainty Model Validation

C13-007 Predicting Limit Cycle Oscillation in an Aeroelastic System Using Nonlinear Normal Modes

C13-036 Nonlinear Analysis of Aeroservoelastic Models with Free Play Using Describing Functions

C13-045 Efficient Computation of Unsteady Aerodynamic Loads Using Computational-Fluid-Dynamics Linearized Methods

C13-048 Evaluation of Quasi-Static Gust Loads Certification Methods for High-Altitude Long-Endurance Aircraft

C13-050 Rotor Loads Prediction Using Helios: A Multisolver Framework for Rotorcraft Aeromechanics Analysis

C13-055 Structural Analysis of a Bearingless Rotor Using an Improved Flexible Multibody Model

C13-060 Design of a Gust-Response-Alleviation Online Control System Based on Neuro-Fuzzy Theory

C13-066 Mechanical Concepts for Simulation of Nonlinearities on Aeroelastic Demonstrator

C13-072 Aileron Reversal of Nonuniform and Swept Composite Aircraft Wings

C13-074 Reliability Based Multidisciplinary Optimization of Aeroelastic Systems with Structural and Aerodynamic Uncertainties

C13-077 Aeroelastic Control Using Distributed Floating Flaps Activated by Piezoelectric Tabs

C13-104 New Flutter-Suppression Method for a Missile Fin with an Actuator

C13-105 New Method of Modeling Uncertainty for Robust Flutter Suppression

C13-108 Loose Fluid-Structure Coupled Approach for a Rotor in Descent Incorporating Fuselage Effects

C13-116 Reduced-Order Model with an Artificial Neural Network for Aerostructural Design Optimization

C13-123 Automatic Embedding of Potential Flow Wake Surfaces in Generic Monolithic Unstructured Meshes

C13-134 Robust Aeroelastic Analysis and Optimization of Composite Wing Under μ-Analysis Framework

C13-140 Experimental Study on Dynamic Characteristics Improvement of Helicopter Hingeless Rotor System

C13-149 Modern Computational Fluid Dynamics/Structural Dynamics Simulation for a Helicopter in Descent

C13-165 Underwing Missile Aerodynamic Effects on Flight-Measured Limit-Cycle Oscillations

C13-174 Engine Placement Effect on Nonlinear Trim and Stability of Flying Wing Aircraft

C13-177 Nonlinear Aeroelastic Formulation and Postflutter Analysis of Flexible High-Aspect-Ratio Wings

C13-193 Wake Effects on Aeroelastic Stability of Hingeless and Bearingless Rotors

Aerospace Plane

C13-161 Scaling Analysis of Propeller-Driven Aircraft for Mars Exploration

Air Transportation

C13-003 System Analysis for an Intermediate Stop Operations Concept on Long Range Routes

C13-039 Optimized Profile Descent Arrivals at Los Angeles International Airport

C13-188 Scaling of Lift Degradation Due to Antiicing Fluids

C13-191 Benefits of Precision Scheduling and Spacing for Arrival Operations

Airframe-Propulsion Integration

C13-025 Active Flow Control of a Boundary Layer-Ingesting Serpentine Inlet Diffuser

Airframe-Weapon System Integration

C13-075 Reduction of Noise Generated by a Half-Open Weapons Bay

C13-155 Dynamic Analysis of Damage to Aircraft Propulsion System Impacted by Exploding Missile

Cabin Environment, Crew Training, and Life Support

C13-016 Computational Fluid Dynamics Simulation of a Post-Crash Aircraft Fire Test

Civil Missions and Transportation

C13-093 Tentative Study of Passenger Comfort During Formation Flight Within Atmospheric Turbulence

C13-142 Regulatory Changes to Enable the Development of More Efficient Transport Category Aircraft

Communication and Air Traffic Control

C13-145 Time–Space Diagram as Controller Support Tool for Closed-Path Continuous-Descent Operations

Configuration Design

C13-012 Design-Exploration Framework for Handling Changes Affecting Conceptual Design

C13-027 Empirically Derived Biplane Lift as a Function of Gap and Stagger

C13-078 Establishing Mission Requirements Based on Consideration of Aircraft Operations

C13-087 Green Flight Challenge: Aircraft Design and Flight Planning for Extreme Fuel Efficiency

C13-097 Lift Distributions for Minimum Induced Drag with Generalized Bending Moment Constraints

C13-133 Preliminary Optimization of the Sonic Boom Properties for Civil Supersonic Aircraft

C13-142 Regulatory Changes to Enable the Development of More Efficient Transport Category Aircraft

C13-159 Relational-Oriented Systems Engineering and Technology Tradeoff Analysis Framework

C13-178 High-Speed Hover-Capable Morphing Micro Air Vehicle

Deceleration Systems

C13-019 Experimental Investigation of Parachute Canopies with Rectangular Parallelepiped Geometries

C13-164 Simulation of Flowfield Around a Ram-Air Personnel Parachute Canopy

Flight Control Integration

C13-070 Bang-Bang Control Applied in Airfoil Roll Control with Plasma Actuators

C13-079 Numerical Assessment of Pneumatic Devices on the Wing/Fuselage Junction of a Tiltrotor

C13-095 Simultaneous Helicopter and Control-System Design

Flight Mechanics

C13-017 Model-Based Flight Testing

C13-030 Maximum Range for Battery-Powered Aircraft

C13-044 Impaired Aircraft Performance Envelope Estimation

C13-056 Multi-Degree-of-Freedom Wind-Tunnel Maneuver Rig for Dynamic Simulation and Aerodynamic Model Identification

C13-147 Dynamic Soaring of Sailplanes over Open Fields

C13-151 Determining Aerodynamic Characteristics of a Micro Air Vehicle Using Motion Tracking

C13-153 Glide Slope Control Authority for Parafoil Canopies with Variable Incidence Angle

C13-169 Wind-Tunnel Investigation of a General-Aviation Differential Pressure Angle-of-Attack Probe

C13-170 Longitudinal Linear Parameter Varying Modeling and Simulation of Morphing Aircraft

C13-184 Investigation of Poststall Pitch Oscillations of an Aircraft Wind-Tunnel Model

C13-185 Bow Wave Effect in Aerial Refueling: Computational Analysis and Modeling

Flight Operations

C13-003 System Analysis for an Intermediate Stop Operations Concept on Long Range Routes

C13-039 Optimized Profile Descent Arrivals at Los Angeles International Airport

C13-078 Establishing Mission Requirements Based on Consideration of Aircraft Operations

C13-084 Investigation of Potential Fuel Savings Due to Continuous-Descent Approach

C13-191 Benefits of Precision Scheduling and Spacing for Arrival Operations

Flow Control

C13-001 Lift Enhancement by Plasma Actuators at Low Reynolds Numbers

C13-006 Active Flow-Separation Control on a High-Lift Wing-Body Configuration

C13-080 Experimental Evaluation of a Self-Contained Circulation-Control Wing

C13-138 Effectiveness of Wing Root Gap for Stall Control

C13-162 Flight and Wind-Tunnel Tests of Closed-Loop Active Flow Control

Fuels and Fuel Systems

C13-084 Investigation of Potential Fuel Savings Due to Continuous-Descent Approach

C13-110 Simulation of Cavitation and Pressure Surge: An Engineering Approach

General Aviation

C13-169 Wind-Tunnel Investigation of a General-Aviation Differential Pressure Angle-of-Attack Probe

Landing Dynamics

C13-189 Helicopter Harsh Landing Events: A Computational Hybrid Methodology to Estimate Fuselage Damage

C13-190 Effects of Freeplay on Dynamic Stability of an Aircraft Main Landing Gear

Lighter-Than-Air Systems

C13-047 Evaluation of Assumed-Transition-Point Criterion in Context of Reynolds-Averaged Simulations Around Lighter-Than-Air Vehicles

C13-106 Airship Buoyancy Control Using Inflatable Vacuum Chambers

Manufacturing

C13-031 Effect of Rapid-Prototyped Airfoil Finish on Loading at Low Reynolds Numbers

C13-057 In-Process Detection of Faying Surface Sealant Application Flaws in Friction Stir Welding

Micro Air Vehicles

C13-013 Deployment Dynamics of a Rolled Micro Air Vehicle Wing

C13-023 Pitch Control of a Micro Air Vehicle with Micropressure Sensors

C13-061 Wing Kinematics Optimization for Hovering Micro Air Vehicles Using Calculus of Variation

C13-063 Aerodynamic Impact of Aspect Ratio at Low Reynolds Number

C13-082 Spanwise Variation in Circulation and Drag of Wings at Moderate Reynolds Number

C13-090 Mean Loads from Wind-Tunnel Turbulence on Low-Aspect-Ratio Flat Plates

C13-099 Planform Effects for Low-Reynolds-Number Thin Wings with Positive and Reflex Cambers

C13-109 Kinematic Optimization of a Flapping Motion for Maneuverability and Sustainability Flights

C13-112 Roll Stall for Low-Aspect-Ratio Wings

C13-113 Understanding Micro Air Vehicle Flapping-Wing Aerodynamics Using Force and Flowfield Measurements

C13-126 Effect of Aspect Ratio on Gurney-Flap Performance

C13-141 Effect of Rotor Geometry and Blade Kinematics on Cycloidal Rotor Hover Performance

C13-151 Determining Aerodynamic Characteristics of a Micro Air Vehicle Using Motion Tracking

C13-168 Study on Powered-Parafoil Longitudinal Flight Performance with a Fast Estimation Model

C13-178 High-Speed Hover-Capable Morphing Micro Air Vehicle

C13-181 Experimental Characterization of Lift on a Rigid Flapping Wing

Noise

C13-039 Optimized Profile Descent Arrivals at Los Angeles International Airport

C13-075 Reduction of Noise Generated by a Half-Open Weapons Bay

C13-081 Refined Tetrahedral Meshes with Mach Cone Aligned Prisms for Sonic Boom Analysis

C13-133 Preliminary Optimization of the Sonic Boom Properties for Civil Supersonic Aircraft

Performance

C13-003 System Analysis for an Intermediate Stop Operations Concept on Long Range Routes

C13-014 Investigation of Trailing-Edge Flap Gap Effects on Rotor Performance Using High-Fidelity Analysis

C13-022 Power Optimization of Solar-Powered Aircraft with Specified Closed Ground Tracks

C13-030 Maximum Range for Battery-Powered Aircraft

C13-031 Effect of Rapid-Prototyped Airfoil Finish on Loading at Low Reynolds Numbers

C13-034 Performance Enhancement of Tilt-Rotor Unmanned Aerial Vehicle Using Nacelle-Fixed Auxiliary Wing

C13-046 Experimental Investigation of Wing-Tip Devices on the Reduction of Induced Drag

C13-061 Wing Kinematics Optimization for Hovering Micro Air Vehicles Using Calculus of Variation

C13-065 Study of Gap Physics of Airfoils with Unsteady Flaps

C13-078 Establishing Mission Requirements Based on Consideration of Aircraft Operations

C13-150 Experimental Performance Evaluation of Coaxial Rotors for a Micro Aerial Vehicle

C13-168 Study on Powered-Parafoil Longitudinal Flight Performance with a Fast Estimation Model

C13-169 Wind-Tunnel Investigation of a General-Aviation Differential Pressure Angle-of-Attack Probe

Propeller and Rotor Systems

C13-140 Experimental Study on Dynamic Characteristics Improvement of Helicopter Hingeless Rotor System

C13-150 Experimental Performance Evaluation of Coaxial Rotors for a Micro Aerial Vehicle

C13-193 Wake Effects on Aeroelastic Stability of Hingeless and Bearingless Rotors

Rotorcraft

C13-014 Investigation of Trailing-Edge Flap Gap Effects on Rotor Performance Using High-Fidelity Analysis

C13-050 Rotor Loads Prediction Using Helios: A Multisolver Framework for Rotorcraft Aeromechanics Analysis

C13-055 Structural Analysis of a Bearingless Rotor Using an Improved Flexible Multibody Model

C13-058 Investigation of UH-60A Rotor Performance and Loads at High Advance Ratios

C13-065 Study of Gap Physics of Airfoils with Unsteady Flaps

C13-079 Numerical Assessment of Pneumatic Devices on the Wing/Fuselage Junction of a Tiltrotor

C13-108 Loose Fluid-Structure Coupled Approach for a Rotor in Descent Incorporating Fuselage Effects

C13-122 Quasi-Steady Modeling of Ice Accretion on a Helicopter Fuselage in Forward Flight

C13-136 Extracting Stochastic Models of Airwake–Downwash Turbulence from a Database for Simulation

C13-149 Modern Computational Fluid Dynamics/Structural Dynamics Simulation for a Helicopter in Descent

C13-150 Experimental Performance Evaluation of Coaxial Rotors for a Micro Aerial Vehicle

C13-178 High-Speed Hover-Capable Morphing Micro Air Vehicle

C13-189 Helicopter Harsh Landing Events: A Computational Hybrid Methodology to Estimate Fuselage Damage

C13-193 Wake Effects on Aeroelastic Stability of Hingeless and Bearingless Rotors

Safety

C13-010 Coupled Numerical Simulation and Experimental Validation of the Electroimpulse De-Icing Process

C13-016 Computational Fluid Dynamics Simulation of a Post-Crash Aircraft Fire Test

C13-036 Nonlinear Analysis of Aeroservoelastic Models with Free Play Using Describing Functions

C13-040 Nested Modeling of Hazards in the National Airspace System

C13-085 Bird Dummy for Investigating the Bird-Strike Resistance of Aircraft Components

C13-173 Numerical Method for Fuzzy Reliability Analysis

C13-188 Scaling of Lift Degradation Due to Antiicing Fluids

Simulation

C13-016 Computational Fluid Dynamics Simulation of a Post-Crash Aircraft Fire Test

C13-017 Model-Based Flight Testing

C13-040 Nested Modeling of Hazards in the National Airspace System

C13-064 Three-Dimensional Numerical Simulation of Ice Accretion at the Engine Inlet

C13-071 Effect of the Model-Sidewall Connection for a Static Airfoil Experiment

C13-084 Investigation of Potential Fuel Savings Due to Continuous-Descent Approach

C13-085 Bird Dummy for Investigating the Bird-Strike Resistance of Aircraft Components

C13-088 Comparison of Turbulence Models in Near Wake of Transport Plane C-130H Fuselage

C13-091 Multi-Stepping Ice Prediction on Cylinders and Other Relevant Geometries

C13-136 Extracting Stochastic Models of Airwake–Downwash Turbulence from a Database for Simulation

C13-185 Bow Wave Effect in Aerial Refueling: Computational Analysis and Modeling

C13-189 Helicopter Harsh Landing Events: A Computational Hybrid Methodology to Estimate Fuselage Damage

Stealth

C13-068 Effect of Missile Turn Rate on Aircraft Susceptibility to Infrared-Guided Missile

STOL/VTOL/STOVL

C13-028 Experimental Study of a Ground Vortex: The Effect of the Crossflow Velocity

C13-034 Performance Enhancement of Tilt-Rotor Unmanned Aerial Vehicle Using Nacelle-Fixed Auxiliary Wing

C13-069 Turbulence Measurements in a Short Take-Off Vertical-Landing Fountain

C13-141 Effect of Rotor Geometry and Blade Kinematics on Cycloidal Rotor Hover Performance

Structural Design (Including Loads)

C13-037 Morphing Aircraft Systems: Historical Perspectives and Future Challenges

C13-048 Evaluation of Quasi-Static Gust Loads Certification Methods for High-Altitude Long-Endurance Aircraft

C13-085 Bird Dummy for Investigating the Bird-Strike Resistance of Aircraft Components

C13-097 Lift Distributions for Minimum Induced Drag with Generalized Bending Moment Constraints

C13-111 Weight Indexing for Airfoil Multi-Objective Optimization

C13-124 Design and Motion Control of Fully Variable Morphing Wings

C13-179 Hybrid Optimization Framework with Proper-Orthogonal-Decomposition-Based Order Reduction and Design-Space Evolution Scheme

Structural Materials

C13-100 Ritz Approach for Buckling Prediction of Cracked-Stiffened Structures

Testing, Flight and Ground

C13-004 Remote Flight Inspection Using Unmanned Aircraft

C13-005 Aeroelastic Wind-Tunnel Test for Aerodynamic Uncertainty Model Validation

C13-017 Model-Based Flight Testing

C13-037 Morphing Aircraft Systems: Historical Perspectives and Future Challenges

Sensor Systems

C13-128 Synthetic Air Data System

Signal Processing

C13-162 Flight and Wind-Tunnel Tests of Closed-Loop Active Flow Control

Software Engineering

C13-154 Fast-Time Modeling of Ground Effects on Wake Vortex Transport and Decay

FLUID DYNAMICS

Aeroacoustics

C13-075 Reduction of Noise Generated by a Half-Open Weapons Bay

C13-102 Detached Eddy Investigation of Cavity Resonance Phenomenon in Slender Cavities

C13-135 Control of Cavity Oscillations in a Supersonic Flow by Microjet Injection

Boundary-Layer Stability and Transition

C13-129 Aircraft Wake-Vortex Decay in Ground Proximity—Physical Mechanisms and Artificial Enhancement

C13-156 Correlation-Based Transition Transport Modeling for Three-Dimensional Aerodynamic Configurations

Computational Fluid Dynamics

C13-006 Active Flow-Separation Control on a High-Lift Wing-Body Configuration

C13-009 Numerical Investigations of Lateral Characteristics of an Air-to-Air Missile

C13-018 Large-Eddy Simulation of Low-Reynolds-Number Flow Over Thick and Thin NACA Airfoils

C13-020 Low-Reynolds-Number Aerodynamic Performances of the NACA 0012 and Selig–Donovan 7003 Airfoils

C13-038 Analysis of the Effects of Streamwise Lift Distribution on Sonic Boom Signature

C13-042 Far-Field Drag Analysis of NASA Common Research Model Simulation

C13-047 Evaluation of Assumed-Transition-Point Criterion in Context of Reynolds-Averaged Simulations Around Lighter-Than-Air Vehicles

C13-050 Rotor Loads Prediction Using Helios: A Multisolver Framework for Rotorcraft Aeromechanics Analysis

C13-076 Separation Dynamics of Air-to-Air Missile Using a Grid-Free Euler Solver

C13-088 Comparison of Turbulence Models in Near Wake of Transport Plane C-130H Fuselage

C13-091 Multi-Stepping Ice Prediction on Cylinders and Other Relevant Geometries

C13-099 Planform Effects for Low-Reynolds-Number Thin Wings with Positive and Reflex Cambers

C13-103 Computational Investigation of Unsteadiness in Propeller Wake–Wing Interactions

C13-109 Kinematic Optimization of a Flapping Motion for Maneuverability and Sustainability Flights

C13-115 Comparison of Octree and Omni-Tree Cartesian Grid for Civil-Plane High-Lift Model Simulations

C13-116 Reduced-Order Model with an Artificial Neural Network for Aerostructural Design Optimization

C13-122 Quasi-Steady Modeling of Ice Accretion on a Helicopter Fuselage in Forward Flight

C13-123 Automatic Embedding of Potential Flow Wake Surfaces in Generic Monolithic Unstructured Meshes

C13-129 Aircraft Wake-Vortex Decay in Ground Proximity—Physical Mechanisms and Artificial Enhancement

C13-130 Quasi-Steady Convergence of Multistep Navier–Stokes Icing Simulations

C13-143 Efficient Decoupled Hydrodynamic and Aerodynamic Analysis of Amphibious Aircraft Water Takeoff Process

C13-156 Correlation-Based Transition Transport Modeling for Three-Dimensional Aerodynamic Configurations

C13-163 Drag Prediction Workshop 4 Results Using Different Grids Including Near-Field/Far-Field Drag Analysis

C13-164 Simulation of Flowfield Around a Ram-Air Personnel Parachute Canopy

C13-166 Computations from the Fourth Drag Prediction Workshop Using the Edge Solver

C13-171 Computations of High-Lift Wing Configuration on Unstructured Grids Using k-ω Models

C13-182 Far-Field Drag Decomposition Applied to the Drag Prediction Workshop 5 Cases

C13-192 Global Sonic Boom Overpressure Variation from Seasonal Temperature, Pressure, and Density Gradients

Hydrodynamics

C13-110 Simulation of Cavitation and Pressure Surge: An Engineering Approach

C13-143 Efficient Decoupled Hydrodynamic and Aerodynamic Analysis of Amphibious Aircraft Water Takeoff Process

Inlet, Nozzle, Diffuser, and Channel Flows

C13-025 Active Flow Control of a Boundary Layer-Ingesting Serpentine Inlet Diffuser

Jets, Wakes, and Viscid-Inviscid Flow Interactions

C13-008 Decay Characteristics of Wake Vortices from Jet Transport Aircraft

C13-043 Simulation of Various Turrets at Subsonic and Transonic Flight Conditions Using OVERFLOW

C13-069 Turbulence Measurements in a Short Take-Off Vertical-Landing Fountain

C13-107 Tunnel Background Noise on Compressible Convex-Corner Flows

Multiphase Flows

C13-110 Simulation of Cavitation and Pressure Surge: An Engineering Approach

Plasmadynamics and MHD

C13-070 Bang-Bang Control Applied in Airfoil Roll Control with Plasma Actuators

Separated Flows

C13-015 Three-Dimensional Laminar-Separation Bubble on a Cambered Thin Wing at Low Reynolds Numbers

C13-020 Low-Reynolds-Number Aerodynamic Performances of the NACA 0012 and Selig–Donovan 7003 Airfoils

C13-033 Improved Stall-Delay Model for Horizontal-Axis Wind Turbines

C13-047 Evaluation of Assumed-Transition-Point Criterion in Context of Reynolds-Averaged Simulations Around Lighter-Than-Air Vehicles

C13-107 Tunnel Background Noise on Compressible Convex-Corner Flows

Shock Waves and Detonations

C13-192 Global Sonic Boom Overpressure Variation from Seasonal Temperature, Pressure, and Density Gradients

Subsonic Flow

C13-027 Empirically Derived Biplane Lift as a Function of Gap and Stagger

C13-088 Comparison of Turbulence Models in Near Wake of Transport Plane C-130H Fuselage

C13-119 T-38 Wind-Tunnel Data Quality Assurance Based on Testing of a Standard Model

C13-132 Experimental Investigation into the Effect of Gurney Flaps on Various Airfoils

Supersonic Flow

C13-038 Analysis of the Effects of Streamwise Lift Distribution on Sonic Boom Signature

C13-076 Separation Dynamics of Air-to-Air Missile Using a Grid-Free Euler Solver

C13-081 Refined Tetrahedral Meshes with Mach Cone Aligned Prisms for Sonic Boom Analysis

C13-135 Control of Cavity Oscillations in a Supersonic Flow by Microjet Injection

Transonic Flow

C13-042 Far-Field Drag Analysis of NASA Common Research Model Simulation

C13-073 Linear Frequency Domain and Harmonic Balance Predictions of Dynamic Derivatives

C13-107 Tunnel Background Noise on Compressible Convex-Corner Flows

C13-163 Drag Prediction Workshop 4 Results Using Different Grids Including Near-Field/Far-Field Drag Analysis

C13-182 Far-Field Drag Decomposition Applied to the Drag Prediction Workshop 5 Cases

Unsteady Flows

C13-018 Large-Eddy Simulation of Low-Reynolds-Number Flow Over Thick and Thin NACA Airfoils

C13-043 Simulation of Various Turrets at Subsonic and Transonic Flight Conditions Using OVERFLOW

C13-073 Linear Frequency Domain and Harmonic Balance Predictions of Dynamic Derivatives

C13-135 Control of Cavity Oscillations in a Supersonic Flow by Microjet Injection

C13-137 Leading-Edge Vortex Structure over Multiple Revolutions of a Rotating Wing

Viscous Non-Boundary-Layer Flows

C13-033 Improved Stall-Delay Model for Horizontal-Axis Wind Turbines

C13-171 Computations of High-Lift Wing Configuration on Unstructured Grids Using k-ω Models

Vortices

C13-008 Decay Characteristics of Wake Vortices from Jet Transport Aircraft

C13-041 Aerodynamic Characteristics of Canard-Forward Swept Wing Aircraft Configurations

C13-043 Simulation of Various Turrets at Subsonic and Transonic Flight Conditions Using OVERFLOW

C13-103 Computational Investigation of Unsteadiness in Propeller Wake–Wing Interactions

C13-109 Kinematic Optimization of a Flapping Motion for Maneuverability and Sustainability Flights

C13-129 Aircraft Wake-Vortex Decay in Ground Proximity—Physical Mechanisms and Artificial Enhancement

C13-137 Leading-Edge Vortex Structure over Multiple Revolutions of a Rotating Wing

C13-154 Fast-Time Modeling of Ground Effects on Wake Vortex Transport and Decay

GUIDANCE, CONTROL, AND DYNAMICS TECHNOLOGY

Aircraft Dynamics

C13-021 Continuation Analysis of Aircraft Ground Loads During High-Speed Turns

C13-117 System Identification for Small, Low-Cost, Fixed-Wing Unmanned Aircraft

C13-118 New Transition Method of a Ducted-Fan Unmanned Aerial Vehicle

C13-183 Upset Dynamics of an Airliner Model: A Nonlinear Bifurcation Analysis

Aircraft Stability and Control

C13-070 Bang-Bang Control Applied in Airfoil Roll Control with Plasma Actuators

C13-095 Simultaneous Helicopter and Control-System Design

C13-118 New Transition Method of a Ducted-Fan Unmanned Aerial Vehicle

C13-148 Stability-Constrained Aerodynamic Shape Optimization of Flying Wings

C13-153 Glide Slope Control Authority for Parafoil Canopies with Variable Incidence Angle

C13-174 Engine Placement Effect on Nonlinear Trim and Stability of Flying Wing Aircraft

Artificial Intelligence

C13-026 High Angle of Attack Parameter Estimation of Cascaded Fins Using Neural Network

Avionics Systems

C13-128 Synthetic Air Data System

Control System Design

C13-023 Pitch Control of a Micro Air Vehicle with Micropressure Sensors

C13-162 Flight and Wind-Tunnel Tests of Closed-Loop Active Flow Control

C13-186 Antiskid Braking Control with On/Off Valves for Aircraft Applications

Control System Effectors

C13-153 Glide Slope Control Authority for Parafoil Canopies with Variable Incidence Angle

Control Theory

C13-095 Simultaneous Helicopter and Control-System Design

Flight Mechanics

C13-161 Scaling Analysis of Propeller-Driven Aircraft for Mars Exploration

C13-183 Upset Dynamics of an Airliner Model: A Nonlinear Bifurcation Analysis

Handling Qualities

C13-021 Continuation Analysis of Aircraft Ground Loads During High-Speed Turns

Missile Dynamics

C13-155 Dynamic Analysis of Damage to Aircraft Propulsion System Impacted by Exploding Missile

Navigation

C13-128 Synthetic Air Data System

Optimization Techniques

C13-022 Power Optimization of Solar-Powered Aircraft with Specified Closed Ground Tracks

C13-053 Optimization of Wind Turbine Blade Airfoils Using a Multi-Objective Genetic Algorithm

C13-061 Wing Kinematics Optimization for Hovering Micro Air Vehicles Using Calculus of Variation

C13-098 Intelligent Structural Rating System Based on Backpropagation Network

C13-133 Preliminary Optimization of the Sonic Boom Properties for Civil Supersonic Aircraft

Robotics

C13-124 Design and Motion Control of Fully Variable Morphing Wings

System Identification

C13-044 Impaired Aircraft Performance Envelope Estimation

C13-172 Flutter Prediction for Flight/Wind-Tunnel Flutter Test Under Atmospheric Turbulence Excitation

Trajectory Optimization

C13-087 Green Flight Challenge: Aircraft Design and Flight Planning for Extreme Fuel Efficiency

UAVs

C13-117 System Identification for Small, Low-Cost, Fixed-Wing Unmanned Aircraft

C13-147 Dynamic Soaring of Sailplanes over Open Fields

INTERDISCIPLINARY TOPICS

Aerospace Management

C13-002 NASA Standard for Models and Simulations: Philosophy and Requirements Overview

Aerospace Technology Utilization

C13-144 Assessing the Impact of Technology on Aircraft Systems Using Technology Impact Forecasting

Analytical and Numerical Methods

C13-012 Design-Exploration Framework for Handling Changes Affecting Conceptual Design

C13-026 High Angle of Attack Parameter Estimation of Cascaded Fins Using Neural Network

C13-144 Assessing the Impact of Technology on Aircraft Systems Using Technology Impact Forecasting

Atmospheric and Space Sciences

C13-024 Using Automatic Dependent Surveillance-Broadcast for Meteorological Monitoring

C13-096 Observed Hazards to Aircraft in Deep Summertime Convective Clouds from 4–7 km

C13-122 Quasi-Steady Modeling of Ice Accretion on a Helicopter Fuselage in Forward Flight

C13-158 Surrogate-Based Optimization of Electrothermal Wing Anti-Icing Systems

Environmental Effects

C13-192 Global Sonic Boom Overpressure Variation from Seasonal Temperature, Pressure, and Density Gradients

Human Factors

C13-051 Optimal and Coherence Zone Comparison Within and Between Flight Simulators

Multidisciplinary Design Optimization

C13-012 Design-Exploration Framework for Handling Changes Affecting Conceptual Design

C13-054 Aircraft Multidisciplinary Design Optimization Under Both Model and Design Variables Uncertainty

C13-074 Reliability Based Multidisciplinary Optimization of Aeroelastic Systems with Structural and Aerodynamic Uncertainties

C13-083 Shape Optimization of Nonplanar Lifting Surfaces and Planar–Nonplanar Break Points

C13-101 Development of Thick Airfoils for Wind Turbines

C13-114 New Principles for Dynamic Aircraft Exergy Mapping

C13-116 Reduced-Order Model with an Artificial Neural Network for Aerostructural Design Optimization

C13-144 Assessing the Impact of Technology on Aircraft Systems Using Technology Impact Forecasting

C13-148 Stability-Constrained Aerodynamic Shape Optimization of Flying Wings

C13-158 Surrogate-Based Optimization of Electrothermal Wing Anti-Icing Systems

C13-159 Relational-Oriented Systems Engineering and Technology Tradeoff Analysis Framework

C13-160 Fracture Analysis of a Curvilinearly Stiffener Panel Subjected to Multiple Combined Loadings

C13-179 Hybrid Optimization Framework with Proper-Orthogonal-Decomposition-Based Order Reduction and Design-Space Evolution Scheme

Reliability, Maintainability, and Logistics Support

C13-054 Aircraft Multidisciplinary Design Optimization Under Both Model and Design Variables Uncertainty

C13-074 Reliability Based Multidisciplinary Optimization of Aeroelastic Systems with Structural and Aerodynamic Uncertainties

C13-098 Intelligent Structural Rating System Based on Backpropagation Network

C13-173 Numerical Method for Fuzzy Reliability Analysis

C13-175 Use of Relevance Vector Machine in Structural Reliability Analysis

Safety

C13-142 Regulatory Changes to Enable the Development of More Efficient Transport Category Aircraft

C13-173 Numerical Method for Fuzzy Reliability Analysis

C13-175 Use of Relevance Vector Machine in Structural Reliability Analysis

LAUNCH VEHICLE AND MISSILE (LV/M) TECHNOLOGY

Aerodynamics

C13-009 Numerical Investigations of Lateral Characteristics of an Air-to-Air Missile

C13-076 Separation Dynamics of Air-to-Air Missile Using a Grid-Free Euler Solver

C13-102 Detached Eddy Investigation of Cavity Resonance Phenomenon in Slender Cavities

Launch Vehicle and Sounding Rocket Systems

C13-068 Effect of Missile Turn Rate on Aircraft Susceptibility to Infrared-Guided Missile

Missile Systems

C13-068 Effect of Missile Turn Rate on Aircraft Susceptibility to Infrared-Guided Missile

Simulation

C13-021 Continuation Analysis of Aircraft Ground Loads During High-Speed Turns

C13-102 Detached Eddy Investigation of Cavity Resonance Phenomenon in Slender Cavities

Structural Design (Including Loads)

C13-094 Determination of Fracture Parameters for Multiple Edge Cracks of a Finite Plate

PROPULSION AND POWER

Batteries

C13-087 Green Flight Challenge: Aircraft Design and Flight Planning for Extreme Fuel Efficiency

Electric Propulsion

C13-030 Maximum Range for Battery-Powered Aircraft

Emissions and Noises

C13-152 High-Speed Turbofan Noise Reduction Using Foam-Metal Liner Over-the-Rotor

Turbomachinery

C13-152 High-Speed Turbofan Noise Reduction Using Foam-Metal Liner Over-the-Rotor

Wind Power

C13-053 Optimization of Wind Turbine Blade Airfoils Using a Multi-Objective Genetic Algorithm

STRUCTURAL MECHANICS AND MATERIALS

C13-180 Stress Intensity Factor Solution for Cracks in Panels with Arbitrarily Located Stringers

Aeroelasticity and Control

C13-005 Aeroelastic Wind-Tunnel Test for Aerodynamic Uncertainty Model Validation

C13-036 Nonlinear Analysis of Aeroservoelastic Models with Free Play Using Describing Functions

C13-062 Flutter and Directional Stability of Aircraft with Wing-Tip Fins: Conflicts and Compromises

C13-066 Mechanical Concepts for Simulation of Nonlinearities on Aeroelastic Demonstrator

C13-072 Aileron Reversal of Nonuniform and Swept Composite Aircraft Wings

C13-121 Stiffness Optimization of Composite Wings with Aeroelastic Constraints

C13-172 Flutter Prediction for Flight/Wind-Tunnel Flutter Test Under Atmospheric Turbulence Excitation

Dynamic Model Analysis

C13-007 Predicting Limit Cycle Oscillation in an Aeroelastic System Using Nonlinear Normal Modes

C13-155 Dynamic Analysis of Damage to Aircraft Propulsion System Impacted by Exploding Missile

Flexible and Active Structures

C13-052 Implementation of a Continuous-Inextensible-Surface Piezocomposite Airfoil

C13-066 Mechanical Concepts for Simulation of Nonlinearities on Aeroelastic Demonstrator

C13-124 Design and Motion Control of Fully Variable Morphing Wings

Structural Composite Materials

C13-010 Coupled Numerical Simulation and Experimental Validation of the Electroimpulse De-Icing Process

C13-072 Aileron Reversal of Nonuniform and Swept Composite Aircraft Wings

C13-121 Stiffness Optimization of Composite Wings with Aeroelastic Constraints

Structural Design

C13-092 Crack Paths in a Friction Stir-Welded Pad-Up for Fuselage Applications

C13-100 Ritz Approach for Buckling Prediction of Cracked-Stiffened Structures

C13-121 Stiffness Optimization of Composite Wings with Aeroelastic Constraints

C13-131 Design, Optimization, and Evaluation of Al–2139 Compression Panel with Integral T-Stiffeners

C13-157 Curvilinearly T-Stiffened Panel-Optimization Framework Under Multiple Load Cases Using Parallel Processing

C13-160 Fracture Analysis of a Curvilinearly Stiffener Panel Subjected to Multiple Combined Loadings

C13-180 Stress Intensity Factor Solution for Cracks in Panels with Arbitrarily Located Stringers

C13-187 Damage Tolerance of FSWed Integral Wing Panel Reinforced by Bonded Crack Retarders

Structural Durability (Including Fatigue, Fracture, and Environmental Degradation)

C13-049 Synthesis of In-Flight Strains Using Flight Parameters for a Fighter Aircraft

C13-086 Quantification of the Material's Resistance to Damage by Lightning

C13-180 Stress Intensity Factor Solution for Cracks in Panels with Arbitrarily Located Stringers

C13-187 Damage Tolerance of FSWed Integral Wing Panel Reinforced by Bonded Crack Retarders

Structural Dynamics and Characterization

C13-010 Coupled Numerical Simulation and Experimental Validation of the Electroimpulse De-Icing Process

C13-013 Deployment Dynamics of a Rolled Micro Air Vehicle Wing

C13-089 Equivalent-Plate Analysis for a Composite Wing with a Control Surface

C13-108 Loose Fluid-Structure Coupled Approach for a Rotor in Descent Incorporating Fuselage Effects

C13-165 Underwing Missile Aerodynamic Effects on Flight-Measured Limit-Cycle Oscillations

C13-167 Dynamic Analysis of Three-Dimensional Semimonocoque Wing Structures

C13-177 Nonlinear Aeroelastic Formulation and Postflutter Analysis of Flexible High-Aspect-Ratio Wings

Structural Finite Elements

C13-089 Equivalent-Plate Analysis for a Composite Wing with a Control Surface

C13-094 Determination of Fracture Parameters for Multiple Edge Cracks of a Finite Plate

C13-100 Ritz Approach for Buckling Prediction of Cracked-Stiffened Structures

C13-160 Fracture Analysis of a Curvilinearly Stiffener Panel Subjected to Multiple Combined Loadings

Structural Modeling

C13-007 Predicting Limit Cycle Oscillation in an Aeroelastic System Using Nonlinear Normal Modes

C13-089 Equivalent-Plate Analysis for a Composite Wing with a Control Surface

C13-157 Curvilinearly T-Stiffened Panel-Optimization Framework Under Multiple Load Cases Using Parallel Processing

C13-190 Effects of Freeplay on Dynamic Stability of an Aircraft Main Landing Gear

Structural Optimization

C13-052 Implementation of a Continuous-Inextensible-Surface Piezocomposite Airfoil

C13-131 Design, Optimization, and Evaluation of Al–2139 Compression Panel with Integral T-Stiffeners

C13-157 Curvilinearly T-Stiffened Panel-Optimization Framework Under Multiple Load Cases Using Parallel Processing

C13-179 Hybrid Optimization Framework with Proper-Orthogonal-Decomposition-Based Order Reduction and Design-Space Evolution Scheme

Structural Stability

C13-131 Design, Optimization, and Evaluation of Al–2139 Compression Panel with Integral T-Stiffeners

C13-172 Flutter Prediction for Flight/Wind-Tunnel Flutter Test Under Atmospheric Turbulence Excitation

C13-190 Effects of Freeplay on Dynamic Stability of an Aircraft Main Landing Gear

Thermal Effects

C13-086 Quantification of the Material's Resistance to Damage by Lightning

THERMOPHYSICS AND HEAT TRANSFER

Ablation, Pyrolysis, Thermal Decomposition and Degradation

C13-086 Quantification of the Material's Resistance to Damage by Lightning

Radiation in Participating Media

C13-011 Global Illumination Technique for Aircraft Infrared Signature Calculations

Radiation Interchange Between Surfaces

C13-011 Global Illumination Technique for Aircraft Infrared Signature Calculations

Thermal Modeling and Analysis

C13-158 Surrogate-Based Optimization of Electrothermal Wing Anti-Icing Systems

Thermophysical Properties

C13-011 Global Illumination Technique for Aircraft Infrared Signature Calculations

JOURNAL OF AIRCRAFT
Vol. 50, No. 6, November–December 2013

2013 Chronological Index

DOI: 10.2514/1.C032644

C13-001 Lift Enhancement by Plasma Actuators at Low Reynolds Numbers. Alexander Vorobiev, R. M. Rennie, and Eric J. Jumper, *University of Notre Dame* (**50**, 1, p. 12) Full Paper based on AIAA Paper

C13-002 NASA Standard for Models and Simulations: Philosophy and Requirements Overview. Steve R. Blattnig, James M. Luckring, and Joseph H. Morrison, *NASA Langley Research Center*; Andre J. Sylvester, *NASA Johnson Space Center*; and Ram K. Tripathi and Thomas A. Zang, *NASA Langley Research Center* (**50**, 1, p. 20) Full Paper based on AIAA Paper 2009-1010

C13-003 System Analysis for an Intermediate Stop Operations Concept on Long Range Routes. Stephan Langhans, Florian Linke, Peter Nolte, and Volker Gollnick, DLR, *German Aerospace Center*, Germany (**50**, 1, p. 29) Full Paper

C13-004 Remote Flight Inspection Using Unmanned Aircraft. C. Barrado, J. Ramírez, M. Pérez-Batlle, E. Santamaria, X. Prats, and E. Pastor, *Universidad Politécnica de Catalunya*, Spain (**50**, 1, p. 38) Full Paper

C13-005 Aeroelastic Wind-Tunnel Test for Aerodynamic Uncertainty Model Validation. Zhigang Wu, Yuting Dai, and Chao Yang, *Beijing University of Aeronautics and Astronautics*, People's Republic of China; and Lei Chen, *Shanghai Aircraft Design and Research Institute*, People's Republic of China (**50**, 1, p. 47) Full Paper

C13-006 Active Flow-Separation Control on a High-Lift Wing-Body Configuration. Vlad Ciobaca, Timo Kühn, and Ralf Rudnik, *DLR, German Aerospace Center*, Germany; Matthias Bauer, *Technical University Berlin*, Germany; Burkhard Gölling, *Airbus Operations GmbH*, Germany; and Wiebke Breitenstein, *University of Applied Sciences Emden/Leer*, Germany (**50**, 1, p. 56) Full Paper based on AIAA Paper

C13-007 Predicting Limit Cycle Oscillation in an Aeroelastic System Using Nonlinear Normal Modes. Christopher W. Emory and Mayuresh J. Patil, *Virginia Polytechnic Institute and State University*, Virginia 24060 (**50**, 1, p. 73) Full Paper based on AIAA Paper 2011-1742

C13-008 Decay Characteristics of Wake Vortices from Jet Transport Aircraft. David C. Burnham, *Scientific and Engineering Solutions, Inc.*; and James N. Hallock, *John A. Volpe National Transportation Systems Center* (**50**, 1, p. 82) Full Paper

C13-009 Numerical Investigations of Lateral Characteristics of an Air-to-Air Missile. R. Balasubramanian, Vaibhav Shah, Konark Arora, R. Krishnamurthy, and Debasis Chakraborty, *Defence Research and Development Laboratory*, India (**50**, 1, p. 88) Full Paper based on AIAA Paper

C13-010 Coupled Numerical Simulation and Experimental Validation of the Electroimpulse De-Icing Process. Enrico Möhle, Matthias C. Haupt, and Peter Horst, *Technische Universität Braunschweig*, Germany (**50**, 1, p. 96) Full Paper

C13-011 Global Illumination Technique for Aircraft Infrared Signature Calculations. *E. Coiro, ONERA*, France (**50**, 1, p. 103) Full Paper

C13-012 Design-Exploration Framework for Handling Changes Affecting Conceptual Design. Marco Nunez and Marin D. Guenov, *Cranfield University*, United Kingdom (**50**, 1, p. 114) Full Paper

C13-013 Deployment Dynamics of a Rolled Micro Air Vehicle Wing. Peter Coffin, Goodarz Ahmadi, Ratan Jha, and Pier Marzocca, *Clarkson University* (**50**, 1, p. 130) Full Paper

C13-014 Investigation of Trailing-Edge Flap Gap Effects on Rotor Performance Using High-Fidelity Analysis. Rohit Jain, *HyPerComp Incorporated*; Hyeonsoo Yeo, *Ames Research Center*; and Inderjit Chopra, *University of Maryland* (**50**, 1, p. 140) Full Paper based on AIAA Paper 2012-1044

C13-015 Three-Dimensional Laminar-Separation Bubble on a Cambered Thin Wing at Low Reynolds Numbers. Z. J. Chen, N. Qin, and A. F. Nowakowski, *University of Sheffield*, United Kingdom (**50**, 1, p. 152) Full Paper

C13-016 Computational Fluid Dynamics Simulation of a Post-Crash Aircraft Fire Test. Zhaozhi Wang, Fuchen Jia, Edwin R. Galea, and John Ewer, *University of Greenwich*, United Kingdom (**50**, 1, p. 164) Full Paper

C13-017 Model-Based Flight Testing. Celso Braga de Mendonça, Edmar Thomaz da Silva, and Marcelo Curvo, *Embraer*, Brazil; and Luís Gonzaga Trabasso, *Instituto Tecnológico de Aeronáutica*, Brazil (**50**, 1, p. 176) Full Paper

C13-018 Large-Eddy Simulation of Low-Reynolds-Number Flow Over Thick and Thin NACA Airfoils. Ryoji Kojima, *University of Tokyo*, Japan; and Taku Nonomura, Akira Oyama, and Kozo Fujii, *Japan Aerospace Exploration Agency*, Japan (**50**, 1, p. 187) Full Paper

C13-019 Experimental Investigation of Parachute Canopies with Rectangular Parallelepiped Geometries. Kenneth J. Desabrais, *U.S. Army Natick Soldier Research, Development, and Engineering Center*; and Hamid Johari, *California State University, Northridge* (**50**, 1, p. 197) Full Paper based on AIAA Paper 2005-1619

C13-020 Low-Reynolds-Number Aerodynamic Performances of the NACA 0012 and Selig–Donovan 7003 Airfoils. Joshua N. N. Counsil and Kiari Goni Boulama, *Royal Military College of Canada*, Canada (**50**, 1, p. 204) Full Paper

C13-021 Continuation Analysis of Aircraft Ground Loads During High-Speed Turns. Etienne Coetzee, *Airbus*, United Kingdom; Bernd Krauskopf, *University of Auckland*, New Zealand; and Mark Lowenberg, *University of Bristol*, United Kingdom (**50**, 1, p. 217) Full Paper

C13-022 Power Optimization of Solar-Powered Aircraft with Specified Closed Ground Tracks. Sara C. Spangelo and Elmer G. Gilbert, *University of Michigan* (**50**, 1, p. 232) Full Paper based on AIAA Paper

C13-023 Pitch Control of a Micro Air Vehicle with Micropressure Sensors. He Shen, Yunjun Xu, and Charles Remeikas, *University of Central Florida* (**50**, 1, p. 239) Full Paper

C13-024 Using Automatic Dependent Surveillance-Broadcast for Meteorological Monitoring. A. M. P. de Leege, *To70 B.V.*, The Netherlands; and M. M. van Paassen and M. Mulder, *Delft University of Technology*, The Netherlands (**50**, 1, p. 249) Full Paper

C13-025 Active Flow Control of a Boundary Layer-Ingesting Serpentine Inlet Diffuser. Neal A. Harrison, Jason Anderson, Jon L. Fleming, and Wing F. Ng, *Techsburg, Inc.* (**50**, 1, p. 262) Full Paper

C13-026 High Angle of Attack Parameter Estimation of Cascaded Fins Using Neural Network. Manoranjan Sinha and Rajesh Ayilliath Kuttieri, *Indian Institute of Technology, Kharagpur*, India; Ajoy Kanti Ghosh, *Indian Institute of Technology, Kanpur*, India; and Ajay Misra, *Defense Institute of Advanced Technology*, India (**50**, 1, p. 272) Full Paper

C13-027 Empirically Derived Biplane Lift as a Function of Gap and Stagger. Hantae Kang, Nicola Genco, and Aaron Altman, *University of Dayton* (**50**, 1, p. 292) Note based on AIAA Paper 2009-1086

C13-028 Experimental Study of a Ground Vortex: The Effect of the Crossflow Velocity. Jorge Manuel Martins Barata, Nuno Bernardo, Pedro José Costa Teixeira Santos, and André Resende Rodrigues Silva, *Universidade Beira Interior*, Portugal (**50**, 1, p. 298) Note based on AIAA Paper 2011-1052

C13-029 On the Transformation of the Angle of Attack for Supersonic Similarity Rules. V. Hermes and H. Olivier, *RWTH Aachen University*, Germany (**50**, 1, p. 302) Note

C13-030 Maximum Range for Battery-Powered Aircraft. Giulio Avanzini, *Università del Salento*, Italy; and Fabrizio Giulietti, *Università di Bologna*, Italy (**50**, 1, p. 304) Note

C13-031 Effect of Rapid-Prototyped Airfoil Finish on Loading at Low Reynolds Numbers. Lance W. Traub, *Embry-Riddle Aeronautical University* (**50**, 1, p. 307) Note

C13-032 Yaw Departure and Recovery of a Tailless Aircraft Configuration. Gloria Stenfelt and Ulf Ringertz, *Royal Institute of Technology*, Sweden (**50**, 1, p. 311) Note

C13-033 Improved Stall-Delay Model for Horizontal-Axis Wind Turbines. Horia Dumitrescu, Florin Frunzulică, and Vladimir Cardoş, *Institute of Statistical Mathematics and Applied Mathematics*, Romania (**50**, 1, p. 315) Note

C13-034 Performance Enhancement of Tilt-Rotor Unmanned Aerial Vehicle Using Nacelle-Fixed Auxiliary Wing. Myeong Kyu Lee and In Lee, *Korea Advanced Institute of Science and Technology*, Republic of Korea (**50**, 1, p. 319) Note

C13-035 Unsteady Momentum Source Method for Efficient Simulation of Rotor Aerodynamics. Y. H. Kim and S. O. Park, *Korea Advanced Institute of Science and Technology*, Republic of Korea (**50**, 1, p. 324) Note

C13-036 Nonlinear Analysis of Aeroservoelastic Models with Free Play Using Describing Functions. Brian Danowsky and Peter M. Thompson, *Systems Technology, Inc.*; and Sunil Kukreja, *NASA Dryden Flight Research Center* (**50**, 2, p. 329) Full Paper based on AIAA Paper 2010-492

C13-037 Morphing Aircraft Systems: Historical Perspectives and Future Challenges. Terrence A. Weisshaar, *Purdue University* (**50**, 2, p. 337) Full Paper

C13-038 Analysis of the Effects of Streamwise Lift Distribution on Sonic Boom Signature. Seung Y. Yoo, *NASA Dryden Flight Research Center* (**50**, 2, p. 354) Full Paper based on AIAA Paper 2010-4961

C13-039 Optimized Profile Descent Arrivals at Los Angeles International Airport. J.-P. Clarke, J. Brooks, G. Nagle, and A. Scacchioli, *Georgia Institute of Technology*; W. White, *Federal Aviation Administration*; and S. R. Liu, *Federal Aviation Administration* (**50**, 2, p. 360) Full Paper

C13-040 Nested Modeling of Hazards in the National Airspace System. Giorgio Calanni Fraccone, Rene Valenzuela-Vega, Shahnewaz Siddique, and Vitali Volovoi, *Georgia Institute of Technology*; and Alex Kirlik, *University of Illinois* (**50**, 2, p. 370) Full Paper based on AIAA Paper 2010-2109

C13-041 Aerodynamic Characteristics of Canard-Forward Swept Wing Aircraft Configurations. G. Q. Zhang and S. C. M. Yu, *Nanyang Technological University*, Republic of Singapore; A. Chien, *University of California*; and S. X. Yang, *Beijing Institute of Technology*, People's Republic of China (**50**, 2, p. 378) Full Paper

C13-042 Far-Field Drag Analysis of NASA Common Research Model Simulation. Makoto Ueno, Kazuomi Yamamoto, Kentaro Tanaka, and Mitsuhiro Murayama, *Japan Aerospace Exploration Agency*, Japan; and Renato Tognaccini, *Università degli Studi di Napoli "Federico II"*, Italy (**50**, 2, p. 388) Full Paper based on AIAA Paper 2011-3699

C13-043 Simulation of Various Turrets at Subsonic and Transonic Flight Conditions Using Overflow. Renato Jelic and Scott Sherer, *U.S. Air Force Research Laboratory*; and Robert Greendyke, *U.S. Air Force Institute of Technology* (**50**, 2, p. 398) Full Paper based on AIAA Paper 2012-464

C13-044 Impaired Aircraft Performance Envelope Estimation. Padmanabhan K. Menon, Prasenjit Sengupta, Sai Vaddi, Bong-Jun Yang, and Jason Kwan, *Optimal Synthesis Inc.* (**50**, 2, p. 410) Full Paper based on AIAA Paper 2011-6688

C13-045 Efficient Computation of Unsteady Aerodynamic Loads Using Computational-Fluid-Dynamics Linearized Methods. Dietmar Fleischer and Christian Breitsamter, *Technische Universität München*, Germany (**50**, 2, p. 425) Full Paper

C13-046 Experimental Investigation of Wing-Tip Devices on the Reduction of Induced Drag. H. D. Céron-Muñoz and R. Cosin, *University of São Paulo*, Brazil; R. F. F. Coimbra, *Federal University of Itajubá*, Brazil; and L. G. N. Correa and F. M. Catalano, *University of São Paulo*, Brazil (**50**, 2, p. 441) Full Paper

C13-047 Evaluation of Assumed-Transition-Point Criterion in Context of Reynolds-Averaged Simulations Around Lighter-Than-Air Vehicles. Sawan Suman, *Texas A&M University*; Sunil Lakshmipathy, *DLR, German Aerospace Center*, Germany; and Rajkumar S. Pant, *Indian Institute of Technology Bombay*, India (**50**, 2, p. 450) Full Paper based on AIAA Paper

C13-048 Evaluation of Quasi-Static Gust Loads Certification Methods for High-Altitude Long-Endurance Aircraft. Anthony P. Ricciardi, Mayuresh J. Patil, and Robert A. Canfield, *Virginia Polytechnical Institute and State University*; and Ned Lindsley, *U.S. Air Force Research Laboratory*, Wright–Patterson Air Force Base, Ohio 45433 (**50**, 2, p. 457) Full Paper

C13-049 Synthesis of In-Flight Strains Using Flight Parameters for a Fighter Aircraft. Agam Sharan, K. Vijayaraju, and Deepa James, *Aeronautical Development Agency*, Bangalore 560017, India (**50**, 2, p. 469) Full Paper

C13-050 Rotor Loads Prediction Using Helios: A Multisolver Framework for Rotorcraft Aeromechanics Analysis. Jayanarayanan Sitaraman, *University of Wyoming*, Laramie, Wyoming 82071; Mark Potsdam, and Andrew Wissink, *U.S. Army Aeroflightdynamics Directorate*; Buvaneswari Jayaraman and Anubhav Datta, *NASA Ames Research Center*; Dimitri Mavriplis, *University of Wyoming*; and Hossein Saberi, *Advanced Rotorcraft Technology, Inc.* (**50**, 2, p. 478) Full Paper based on AIAA Paper 2011-1123

C13-051 Optimal and Coherence Zone Comparison Within and Between Flight Simulators. Bruno Jorge Correia Grácio, Ana Rita Valente Pais, M. M. (René) van Paassen, and Max Mulder, *Delft University of Technology*, The Netherlands; and Lon C. Kelly and Jacob A. Houck, *NASA Langley Research Center* (**50**, 2, p. 493) Full Paper based on AIAA Paper 2011-6556

C13-052 Implementation of a Continuous-Inextensible-Surface Piezocomposite Airfoil. Onur Bilgen and Michael I. Friswell, *Swansea University*, United Kingdom (**50**, 2, p. 508) Full Paper based on AIAA Paper 2012-1902

C13-053 Optimization of Wind Turbine Blade Airfoils Using a Multi-Objective Genetic Algorithm. Xiaomin Chen and Ramesh K. Agarwal, *Washington University in St. Louis* (**50**, 2, p. 519) Full Paper

C13-054 Aircraft Multidisciplinary Design Optimization Under Both Model and Design Variables Uncertainty. L. Jaeger, C. Gogu, S. Segonds, and C. Bes, *Université de Toulouse*, France (**50**, 2, p. 528) Full Paper

C13-055 Structural Analysis of a Bearingless Rotor Using an Improved Flexible Multibody Model. TaeYoung Chun, *Mechanical Engineering R and D Lab*, Republic of Korea; Hanyeol Ryu, Hae Cho Seong, and SangJoon Shin, *Institute of Advanced Aerospace Technology, Seoul National University*, Republic of Korea; and YoungJung Kee and Deog-Kwan Kim, *Korea Aerospace Research Institute*, Republic of Korea (**50**, 2, p. 539) Full Paper

C13-056 Multi-Degree-of-Freedom Wind-Tunnel Maneuver Rig for Dynamic Simulation and Aerodynamic Model Identification. J. Pattinson and M. H. Lowenberg, *University of Bristol*, United Kingdom; and M. G. Goman, *De Montfort University*, United Kingdom (**50**, 2, p. 551) Full Paper based on AIAA Paper

C13-057 In-Process Detection of Faying Surface Sealant Application Flaws in Friction Stir Welding. B. T. Gibson, D. M. Wilkes, G. E. Cook, and A. M. Strauss, *Vanderbilt University* (**50**, 2, p. 567) Full Paper

C13-058 Investigation of UH-60A Rotor Performance and Loads at High Advance Ratios. Hyeonsoo Yeo, *U.S. Army Aeroflightdynamics Directorate (AMRDEC)* (**50**, 2, p. 576) Full Paper based on AIAA Paper

C13-059 Aerodynamic Characteristics of a Pitching Airfoil Through Pressure-Distortion Correction in Pneumatic Tubing. Dong-Ha Kim, *Korean Air R&D Center*, Republic of Korea; and Jo-Won Chang and Hark-Bong Kim, *Korea Aerospace University*, Republic of Korea (**50**, 2, p. 590) Full Paper

C13-060 Design of a Gust-Response-Alleviation Online Control System Based on Neuro-Fuzzy Theory. Ke Shao, *Shanghai Jiao Tong University*, People's Republic of China; Chao Yang and Zhigang Wu, *Beijing University of Aeronautics and Astronautics*, People's Republic of China; Hong Liu, *Shanghai Jiao Tong University*, People's Republic of China; and Baole Wen, *University of New Hampshire* (**50**, 2, p. 599) Full Paper

C13-061 Wing Kinematics Optimization for Hovering Micro Air Vehicles Using Calculus of Variation. Haithem E. Taha, Muhammad R. Hajj, and Ali H. Nayfeh, *Virginia Polytechnic Institute and State University* (**50**, 2, p. 610) Full Paper

C13-062 Flutter and Directional Stability of Aircraft with Wing-Tip Fins: Conflicts and Compromises. Matthew P. Snyder, *European Office of Aerospace Research and Development*, United Kingdom; and Terrence A. Weisshaar, *Purdue University* (**50**, 2, p. 615) Full Paper based on AIAA Paper 2012-1455

C13-063 Aerodynamic Impact of Aspect Ratio at Low Reynolds Number. Lance W. Traub, *Embry-Riddle Aeronautical University* (**50**, 2, p. 626) Full Paper

C13-064 Three-Dimensional Numerical Simulation of Ice Accretion at the Engine Inlet. Xiaobin Shen, Guiping Lin, Jia Yu, Xueqin Bu, and Chenhui Du, *Beihang University*, People's Republic of China (**50**, 2, p. 635) Full Paper

C13-065 Study of Gap Physics of Airfoils with Unsteady Flaps. Nicholas Liggett and Marilyn J. Smith, *Georgia Institute of Technology* (**50**, 2, p. 643) Full Paper

C13-066 Mechanical Concepts for Simulation of Nonlinearities on Aeroelastic Demonstrator. J. Malecek, J. Cecrdle, V. Hlavaty, and P. Malinek, *Aeronautical Research and Test Institute*, Czech Republic (**50**, 2, p. 651) Note

C13-067 Active Control of Helicopter Structural Response Using Piezoelectric Stack Actuators. Laishou Song and Pinqi Xia, *Nanjing University of Aeronautics and Astronautics*, People's Republic of China (**50**, 2, p. 659) Note

C13-068 Effect of Missile Turn Rate on Aircraft Susceptibility to Infrared-Guided Missile. Hemant R. Sonawane and Shripad P. Mahulikar, *Indian Institute of Technology Bombay*, India (**50**, 2, p. 663) Note

C13-069 Turbulence Measurements in a Short Take-Off Vertical-Landing Fountain. A. J. Saddington and K. Knowles, *Cranfield University*, United Kingdom (**50**, 2, p. 667) Note

C13-070 Bang-Bang Control Applied in Airfoil Roll Control with Plasma Actuators. Qingkai Wei, *Peking University*, People's Republic of China; Zhongguo Niu and Bao Chen, *Aviation Industry Corporation of China*, People's Republic of China; and Xun Huang, *Peking University*, People's Republic of China (**50**, 2, p. 670) Note based on AIAA Paper 2012-4538

C13-071 Effect of the Model-Sidewall Connection for a Static Airfoil Experiment. A. D. Gardner and K. Richter, *German Aerospace Center (DLR)*, Germany (**50**, 2, p. 677) Note

C13-072 Aileron Reversal of Nonuniform and Swept Composite Aircraft Wings. Keun-Taek Kim, *Korea Aerospace Research Institute*, Republic of Korea; and Ohseop Song, *Chungnam National University*, Republic of Korea (**50**, 3, p. 681) Full Paper

C13-073 Linear Frequency Domain and Harmonic Balance Predictions of Dynamic Derivatives. A. Da Ronch, A. J. McCracken, and K. J. Badcock, *University of Liverpool*. United Kingdom; M. Widhalm, *DLR, German Aerospace Center*, Germany; and M. S. Campobasso, *Glasgow University*, United Kingdom (**50**, 3, p. 694) Full Paper based on AIAA Paper 2010-4699

C13-074 Reliability Based Multidisciplinary Optimization of Aeroelastic Systems with Structural and Aerodynamic Uncertainties. Melike Nikbay and Muhammet N. Kuru, *Istanbul Technical University*, Turkey (**50**, 3, p. 708) Full Paper based on AIAA Paper 2010-9187

C13-075 Reduction of Noise Generated by a Half-Open Weapons Bay. Marta B. Panickar, Nathan E. Murray, Bernard J. Jansen, and Matthew P. Joachim, *University of Mississippi*; and Roger Birkbeck, Chandrasekhar Kannepalli, and Neeraj Sinha, *Combustion Research and Flow Technology, Inc.* (**50**, 3, p. 716) Full Paper

C13-076 Separation Dynamics of Air-to-Air Missile Using a Grid-Free Euler Solver. K. Anandhanarayanan, Konark Arora, Vaibhav Shah, R. Krishnamurthy, and Debasis Chakraborty, *Defence Research and Development Laboratory*, India (**50**, 3, p. 725) Full Paper

C13-077 Aeroelastic Control Using Distributed Floating Flaps Activated by Piezoelectric Tabs. Lars O. Bernhammer and Roeland De Breuker, *Delft University of Technology*, The Netherlands; Moti Karpel, *Technion—Israel Institute of Technology*, Israel; and Gijs J. van der Veen, *Delft University of Technology*, The Netherlands (**50**, 3, p. 732) Full Paper

C13-078 Establishing Mission Requirements Based on Consideration of Aircraft Operations. Robert A. McDonald, *California Polytechnic State University* (**50**, 3, p. 741) Full Paper based on AIAA Paper

C13-079 Numerical Assessment of Pneumatic Devices on the Wing/Fuselage Junction of a Tiltrotor. Nicola Simioni and Rita Ponza, *HIT09 S.r.l.*, Italy; and Ernesto Benini, *University of Padova*, Italy (**50**, 3, p. 752) Full Paper

C13-080 Experimental Evaluation of a Self-Contained Circulation-Control Wing. Lance W. Traub and Matthew Biegner, *Embry-Riddle Aeronautical University* (**50**, 3, p. 764) Full Paper

C13-081 Refined Tetrahedral Meshes with Mach Cone Aligned Prisms for Sonic Boom Analysis. Susan E. Cliff, *NASA Ames Research Center*; Alaa A. Elmiligui and Richard L. Campbell, *NASA Langley Research Center*; and Scott D. Thomas, *Dell Services Federal Government* (**50**, 3, p. 778) Full Paper based on AIAA Paper 2011-3338

C13-082 Spanwise Variation in Circulation and Drag of Wings at Moderate Reynolds Number. S. L. Yang and G. R. Spedding, *University of Southern California* (**50**, 3, p. 791) Full Paper

C13-083 Shape Optimization of Nonplanar Lifting Surfaces and Planar–Nonplanar Break Points. Matej Andrejašič and Gregor Veble, *Pipistrel d.o.o. Ajdovščina*, Slovenia (**50**, 3, p. 798) Full Paper

C13-084 Investigation of Potential Fuel Savings Due to Continuous-Descent Approach. Li Jin, Yi Cao, and Dengfeng Sun, *Purdue University* (**50**, 3, p. 807) Full Paper

C13-085 Bird Dummy for Investigating the Bird-Strike Resistance of Aircraft Components. A. N. Shupikov, S. V. Ugrimov, N. V. Smetankina, and V. G. Yareshchenko, *National Academy of Sciences of Ukraine*, Ukraine; G. G. Onhirsky, V. P. Ukolov, and V. F. Samoylenko, *Antonov Aeronautical Scientific/Technical Complex*, Ukraine; and V. L. Avramenko, *National Technical University*, Ukraine (**50**, 3, p. 817) Full Paper

C13-086 Quantification of the Material's Resistance to Damage by Lightning. Yulia Kostogorova-Beller, *National Institute for Aviation Research*; and Fridrikh S. Diatchkovski, *Ultratab Laboratories* (**50**, 3, p. 827) Full Paper

C13-087 Green Flight Challenge: Aircraft Design and Flight Planning for Extreme Fuel Efficiency. Jack W. Langelaan, Anjan Chakrabarty, Aijun Deng, and Kirk Miles, *Pennsylvania State University*; and Vid Plevnik, Jure Tomazic, Tine Tomazic, and Gregor Veble, *Pipistrel d.o.o Ajdovščina*, Slovenia (**50**, 3, p. 832) Full Paper

C13-088 Comparison of Turbulence Models in Near Wake of Transport Plane C-130H Fuselage. Samuel K. H. Pang, E. Y. K. Ng, and W. S. Chiu, *Nanyang Technological University*, Republic of Singapore (**50**, 3, p. 847) Full Paper

C13-089 Equivalent-Plate Analysis for a Composite Wing with a Control Surface. Young-Ho Na and SangJoon Shin, *Seoul National University*, Republic of Korea (**50**, 3, p. 853) Full Paper based on AIAA Paper 2012-1474

C13-090 Mean Loads from Wind-Tunnel Turbulence on Low-Aspect-Ratio Flat Plates. Michael Jon Sytsma, *U.S. Air Force Research Laboratory*; and Lawrence Ukeiley, *University of Florida* (**50**, 3, p. 863) Full Paper based on AIAA Paper 2012-1184

C13-091 Multi-Stepping Ice Prediction on Cylinders and Other Relevant Geometries. Patrick G. Verdin, *Cranfield University*, United Kingdom; and Jean P. F. Charpin, *University of Limerick*, Ireland (**50**, 3, p. 871) Full Paper

C13-092 Crack Paths in a Friction Stir-Welded Pad-Up for Fuselage Applications. Yu E. Ma, Bao Qi Liu, and Zhen Qiang Zhao, *Northwestern Polytechnical University*, People's Republic of China (**50**, 3, p. 879) Full Paper

C13-093 Tentative Study of Passenger Comfort During Formation Flight Within Atmospheric Turbulence. Nicholas Bizinos and Christiaan Redelinghuys, *University of Cape Town*, South Africa (**50**, 3, p. 886) Full Paper

C13-094 Determination of Fracture Parameters for Multiple Edge Cracks of a Finite Plate. Amit K. Strivastava and Achchhe Lal, *S. V. National Institute of Technology*, India (**50**, 3, p. 901) Full Paper

C13-095 Simultaneous Helicopter and Control-System Design. Tugrul Oktay, *Erciyes University*, Turkey; and Cornel Sultan, *Virginia Polytechnic Institute and State University*, Virginia 24061 (**50**, 3, p. 911) Full Paper

C13-096 Observed Hazards to Aircraft in Deep Summertime Convective Clouds from 4–7 km. Shawn B. Honomichl, Andrew G. Detwiler, and Paul L. Smith, *South Dakota School of Mines and Technology* (**50**, 3, p. 926) Full Paper

C13-097 Lift Distributions for Minimum Induced Drag with Generalized Bending Moment Constraints. David J. Pate and Brian J. German, *Georgia Institute of Technology* (**50**, 3, p. 936) Full Paper

C13-098 Intelligent Structural Rating System Based on Back-propagation Network. Xi Chen and He Ren, *RMIT University*, Australia; and Jian Liu, *Shanghai Aircraft Customer Service Company, Ltd.*, People's Republic of China (**50**, 3, p. 947) Full Paper

C13-099 Planform Effects for Low-Reynolds-Number Thin Wings with Positive and Reflex Cambers. Z. J. Chen and N. Qin, *University of Sheffield*, United Kingdom (**50**, 3, p. 952) Full Paper

C13-100 Ritz Approach for Buckling Prediction of Cracked-Stiffened Structures. Thi D. Dang and Rakesh K. Kapania, *Virginia Polytechnic Institute and State University* (**50**, 3, p. 965) Full Paper based on AIAA Paper 2010-2530

C13-101 Development of Thick Airfoils for Wind Turbines. F. Grasso, *Energy Research Centre of the Netherlands*, The Netherlands (**50**, 3, p. 975) Full Paper based on AIAA Paper 2012-0236

C13-102 Detached Eddy Investigation of Cavity Resonance Phenomenon in Slender Cavities. Shoeb A. Syed and Klaus A. Hoffmann, *Wichita State University* (**50**, 3, p. 982) Note

C13-103 Computational Investigation of Unsteadiness in Propeller Wake–Wing Interactions. Alasdair Thom, *University of Glasgow*, United Kingdom; and Karthikeyan Duraisamy, *Stanford University* (**50**, 3, p. 985) Note

C13-104 New Flutter-Suppression Method for a Missile Fin with an Actuator. X. T. Zhang, Z. G. Wu, and C. Yang, *Beihang University*, People's Republic of China (**50**, 3, p. 989) Note

C13-105 New Method of Modeling Uncertainty for Robust Flutter Suppression. Wenmin Qian, Rui Huang, Haiyan Hu, and Yonghui Zhao, *Nanjing University of Aeronautics and Astronautics*, People's Republic of China (**50**, 3, p. 994) Note

C13-106 Airship Buoyancy Control Using Inflatable Vacuum Chambers. Sean A. Barton, *Florida State University* (**50**, 4, p. 1001) Full Paper based on AIAA Paper 2011-1717

C13-107 Tunnel Background Noise on Compressible Convex-Corner Flows. Kung-Ming Chung, Po-Hsiung Chang, and Keh-Chin Chang, *National Cheng-Kung University*, Republic of China (**50**, 4, p. 1011) Full Paper

C13-108 Loose Fluid-Structure Coupled Approach for a Rotor in Descent Incorporating Fuselage Effects. Sung Nam Jung, Jeong Hwan Sa, Young Hyun You, Jae Sang Park, and Soo Hyung Park, *Konkuk University*, Republic of Korea (**50**, 4, p. 1016) Full Paper

C13-109 Kinematic Optimization of a Flapping Motion for Maneuverability and Sustainability Flights. Jung-Sun Choi and Jae-Woong Kim, *Hanyang University*, Republic of Korea; and Gyung-Jin Park, and Do-Hyung Lee, *Hanyang University*, Republic of Korea (**50**, 4, p. 1027) Full Paper

C13-110 Simulation of Cavitation and Pressure Surge: An Engineering Approach. Hans Ellström and Hampus Gavel, *Saab Aeronautics*, Sweden (**50**, 4, p. 1038) Full Paper based on AIAA Paper 2011-6676

C13-111 Weight Indexing for Airfoil Multi-Objective Optimization. A. Elham and M. J. L. van Tooren, *Delft University of Technology*, The Netherlands (**50**, 4, p. 1046) Full Paper

C13-112 Roll Stall for Low-Aspect-Ratio Wings. Matt Shields and Kamran Mohseni, *University of Florida* (**50**, 4, p. 1060) Full Paper based on AIAA Paper 2012-4462

C13-113 Understanding Micro Air Vehicle Flapping-Wing Aerodynamics Using Force and Flowfield Measurements. Pranay Seshadri, *University of Cambridge*, United Kingdom; and Moble Benedict and Inderjit Chopra, *University of Maryland*(**50**, 4, p. 1070) Full Paper based on AIAA Paper 2012-1639

C13-114 New Principles for Dynamic Aircraft Exergy Mapping. Frederick T. N. Berg, Martin J. Balchin, and Patrick S. Keogh, *University of Bath*, United Kingdom (**50**, 4, p. 1088) Full Paper

C13-115 Comparison of Octree and Omni-Tree Cartesian Grid for Civil-Plane High-Lift Model Simulations. Weimin Sang and Yu Shi, *Northwestern Polytechnical University*, People's Republic of China (**50**, 4, p. 1099) Full Paper

C13-116 Reduced-Order Model with an Artificial Neural Network for Aerostructural Design Optimization. Kyung Hyun Park, *Seoul National University*, Republic of Korea; Sang Ook Jun, *Samsung Electro-Mechanics*, Republic of Korea; Sung Min Baek, *Hyundai Heavy Industries*, Republic of Korea; Maeng Hyo Cho, *Seoul National University*, Republic of Korea; Kwan Jung Yee, *Pusan National University*, Republic of Korea; and Dong Ho Lee, *Seoul National University*, Republic of Korea (**50**, 4, p. 1106) Full Paper

C13-117 System Identification for Small, Low-Cost, Fixed-Wing Unmanned Aircraft. Andrei Dorobantu, Austin Murch, Bérénice Mettler, and Gary Balas, *University of Minnesota* (**50**, 4, p. 1117) Full Paper

C13-118 New Transition Method of a Ducted-Fan Unmanned Aerial Vehicle. Weize Zhang, Quan Quan, Ruifeng Zhang, and Kai-Yuan Cai, *Beijing University of Aeronautics and Astronautics*, People's Republic of China (**50**, 4, p. 1131) Full Paper

C13-119 T-38 Wind-Tunnel Data Quality Assurance Based on Testing of a Standard Model. Dijana Damljanović and Jovan Isaković, *VTI, Military Technical Institute*, Serbia; and Boško Rašuo, *University of Belgrade*, Serbia (**50**, 4, p. 1141) Full Paper based on AIAA Paper 2012-3231

C13-120 Active Load Control of a Wind Turbine Airfoil Using Microtabs. Aubryn M. Cooperman, Raymond Chow, and C. P. van Dam, *University of California, Davis* (**50**, 4, p. 1150) Full Paper

C13-121 Stiffness Optimization of Composite Wings with Aeroelastic Constraints. J. K. S. Dillinger and T. Klimmek, *DLR, German Aerospace Center*, Germany; and M. M. Abdalla and Z. Gürdal, *Delft University of Technology*, The Netherlands (**50**, 4, p. 1159) Full Paper based on AIAA Paper

C13-122 Quasi-Steady Modeling of Ice Accretion on a Helicopter Fuselage in Forward Flight. Habibollah Fouladi and Wagdi G. Habashi, *McGill University*, Canada; and Isik A. Ozcer, *Newmerical Technologies International*, Canada (**50**, 4, p. 1169) Full Paper based on AIAA Paper 2012-2674

C13-123 Automatic Embedding of Potential Flow Wake Surfaces in Generic Monolithic Unstructured Meshes. A. Parrinello, M. Morandini, and P. Mantegazza, *Politecnico di Milano*, Italy (**50**, 4, p. 1179) Full Paper

C13-124 Design and Motion Control of Fully Variable Morphing Wings. Amin Moosavian, Fengfeng Xi, and Seyed M. Hashemi, *Ryerson University*, Canada (**50**, 4, p. 1189) Full Paper

C13-125 Mach and Reynolds Number Dependencies of the Stall Behavior of High-Lift Wing-Sections. J. Wild, *DLR, German Aerospace Center*, Germany (**50**, 4, p. 1202) Full Paper based on AIAA Paper 2012-108

C13-126 Effect of Aspect Ratio on Gurney-Flap Performance. Libin Daniel and Lance W. Traub, *Embry Riddle Aeronautical University* (**50**, 4, p. 1217) Full Paper

C13-127 Lifting-Line Predictions for Induced Drag and Lift in Ground Effect. W. F. Phillips, *Utah State University*; and D. F. Hunsaker, *Scaled Composites* (**50**, 4, p. 1226) Full Paper based on AIAA Paper

C13-128 Synthetic Air Data System. F. Adhika Pradipta Lie and Demoz Gebre-Egziabher, *University of Minnesota* (**50**, 4, p. 1234) Full Paper based on AIAA Paper 2012-4704

C13-129 Aircraft Wake-Vortex Decay in Ground Proximity—Physical Mechanisms and Artificial Enhancement. Anton Stephan, Frank Holzäpfel, and Takashi Misaka, *DLR, German Aerospace Research Center*, Germany (**50**, 4, p. 1250) Full Paper based on AIAA Paper

C13-130 Quasi-Steady Convergence of Multistep Navier–Stokes Icing Simulations. K. Hasanzadeh, E. Laurendeau, and I. Paraschivoiu, *École Polytechnique*, Canada (**50**, 4, p. 1261) Full Paper

C13-131 Design, Optimization, and Evaluation of Al–2139 Compression Panel with Integral T-Stiffeners. Sameer B. Mulani, *Virginia Polytechnic Institute and State University*; David Havens and Ashley Norris, *Lockheed Martin Aeronautics Company*; R. Keith Bird, *NASA Langley Research Center*; Rakesh K. Kapania, *Virginia Polytechnic Institute and State University*; and Olliffe Robert, *Lockheed Martin Aeronautics Company* (**50**, 4, p. 1275) Full Paper

C13-132 Experimental Investigation into the Effect of Gurney Flaps on Various Airfoils. Julia A. Cole, Bernardo A. O. Vieira, James G. Coder, Amandeep Premi, and Mark D. Maughmer, *Pennsylvania State University* (**50**, 4, p. 1287) Full Paper based on AIAA Paper

C13-133 Preliminary Optimization of the Sonic Boom Properties for Civil Supersonic Aircraft. Gennaro Scarselli and Elisa Castorini, *Università del Salento*, Italy (**50**, 4, p. 1295) Note

C13-134 Robust Aeroelastic Analysis and Optimization of Composite Wing Under μ-Analysis Framework. Qi Ouyang and Xiaoqian Chen, *National University of Defense Technology*, People's Republic of China; and Jonathan E. Cooper, *University of Bristol*, United Kingdom (**50**, 4, p. 1299) Note

C13-135 Control of Cavity Oscillations in a Supersonic Flow by Microjet Injection. Varun Thangamani and Job Kurian, *Indian Institute of Technology*, India (**50**, 4, p. 1305) Note

C13-136 Extracting Stochastic Models of Airwake–Downwash Turbulence from a Database for Simulation . Gopal H. Gaonkar, *Florida Atlantic University* (**50**, 4, p. 1309) Note based on AIAA Paper

C13-137 Leading-Edge Vortex Structure over Multiple Revolutions of a Rotating Wing. Siddarth Kolluru Venkata and Anya R. Jones, *University of Maryland* (**50**, 4, p. 1312) Note

C13-138 Effectiveness of Wing Root Gap for Stall Control. Libin Daniel and Lance W. Traub, *Embry Riddle Aeronautical University* (**50**, 4, p. 1316) Note

C13-139 Positive and Negative Spanwise Flow Development on an Insect-Like Rotating Wing. Nathan Phillips and Kevin Knowles, *Cranfield University*, United Kingdom (**50**, 5, p. 1321) Full Paper

C13-140 Experimental Study on Dynamic Characteristics Improvement of Helicopter Hingeless Rotor System. Deog-Kwan Kim and In Lee, *Korea Advanced Institute of Science and Technology*, Republic of Korea; and Keun-Woong Song and Gene Joo, *Korea Aerospace Research Institute*, Republic of Korea (**50**, 5, p. 1333) Full Paper

C13-141 Effect of Rotor Geometry and Blade Kinematics on Cycloidal Rotor Hover Performance. Moble Benedict, Tejaswi Jarugumilli, and Inderjit Chopra, *University of Maryland* (**50**, 5, p. 1340) Full Paper

C13-142 Regulatory Changes to Enable the Development of More Efficient Transport Category Aircraft. Timothy T. Takahashi, *Arizona State University* (**50**, 5, p. 1353) Full Paper based on AIAA Paper 2012-335

C13-143 Efficient Decoupled Hydrodynamic and Aerodynamic Analysis of Amphibious Aircraft Water Takeoff Process. Liangjun Qiu and Wenbin Song, *Shanghai Jiao Tong University*, People's Republic of China (**50**, 5, p. 1369) Full Paper

C13-144 Assessing the Impact of Technology on Aircraft Systems Using Technology Impact Forecasting. Danielle S. Soban, *Queen's University of Belfast*, United Kingdom; and Dimitri N. Mavris, *Georgia Institute of Technology* (**50**, 5, p. 1380) Full Paper based on AIAA Paper

C13-145 Time–Space Diagram as Controller Support Tool for Closed-Path Continuous-Descent Operations. A. M. P. de Leege, *To70 B.V.*, The Netherlands; and M. M. van Paassen, A. C. in't Veld, and M. Mulder, *Delft University of Technology*, The Netherlands (**50**, 5, p. 1394) Full Paper based on AIAA Paper 2011-6220

C13-146 Nonlinear Modal Analysis of a Full-Scale Aircraft. G. Kerschen, M. Peeters and J. C. Golinval, *University of Liège*, Belgium; and C. Stéphan, *ONERA–The French Aerospace Lab*, France (**50**, 5, p. 1409) Full Paper

C13-147 Dynamic Soaring of Sailplanes over Open Fields. Pritam P. Sukumar and Michael S. Selig, *University of Illinois at Urbana–Champaign* (**50**, 5, p. 1420) Full Paper based on AIAA Paper

C13-148 Stability-Constrained Aerodynamic Shape Optimization of Flying Wings. Charles A. Mader, *University of Toronto*, Canada; and Joaquim R. R. A. Martins, *University of Michigan* (**50**, 5, p. 1431) Full Paper based on AIAA Paper

C13-149 Modern Computational Fluid Dynamics/Structural Dynamics Simulation for a Helicopter in Descent. Young H. You, Jeong H. Sa, Jae S. Park, Soo H. Park, and Sung N. Jung, *Konkuk University*, Republic of Korea (**50**, 5, p. 1450) Full Paper

C13-150 Experimental Performance Evaluation of Coaxial Rotors for a Micro Aerial Vehicle. Puneet Singh and C. Venkatesan, *Indian Institute of Technology*, India (**50**, 5, p. 1465) Full Paper

C13-151 Determining Aerodynamic Characteristics of a Micro Air Vehicle Using Motion Tracking. Daniel V. Uhlig and Michael S. Selig, *University of Illinois at Urbana–Champaign* (**50**, 5, p. 1481) Full Paper based on AIAA Paper 2010-8416

C13-152 High-Speed Turbofan Noise Reduction Using Foam-Metal Liner Over-the-Rotor. Daniel L. Sutliff, *NASA John H. Glenn Research Center at Lewis Field*; Michael G. Jones, *NASA Langley Research Center*; and Thomas C. Hartley, *Williams International* (**50**, 5, p. 1491) Full Paper based on AIAA Paper

C13-153 Glide Slope Control Authority for Parafoil Canopies with Variable Incidence Angle. Michael Ward, Alek Gavrilovski, and Mark Costello, *Georgia Institute of Technology* (**50**, 5, p. 1504) Full Paper based on AIAA Paper 2011-2620

C13-154 Fast-Time Modeling of Ground Effects on Wake Vortex Transport and Decay. I. De Visscher, T. Lonfils, and G. Winckelmans, *Université catholique de Louvain*, Belgium (**50**, 5, p. 1514) Full Paper

C13-155 Dynamic Analysis of Damage to Aircraft Propulsion System Impacted by Exploding Missile. Sunil K. Sinha, *General Electric Company*; Gregory J. Czarnecki, *Wright–Patterson Air Force Base*; and Ronald L. Hinrichsen, *RHAMM Technologies, LLC* (**50**, 5, p. 1526) Full Paper based on AIAA Paper 2012-1505

C13-156 Correlation-Based Transition Transport Modeling for Three-Dimensional Aerodynamic Configurations. Cornelia Grabe and Andreas Krumbein, *DLR, German Aerospace Center*, Germany (**50**, 5, p. 1533) Full Paper based on AIAA Paper 2012-448

C13-157 Curvilinearly T-Stiffened Panel-Optimization Framework Under Multiple Load Cases Using Parallel Processing. Sameer B. Mulani, Vedavyas Duggirala, and Rakesh K. Kapania, *Virginia Polytechnic Institute and State University* (**50**, 5, p. 1540) Full Paper based on AIAA Paper 2012-1754

C13-158 Surrogate-Based Optimization of Electrothermal Wing Anti-Icing Systems. Mahdi Pourbagian and Wagdi G. Habashi, *McGill University*, Canada (**50**, 5, p. 1555) Full Paper based on AIAA Paper 2012-2677

C13-159 Relational-Oriented Systems Engineering and Technology Tradeoff Analysis Framework. Dimitri N. Mavris and Kelly Griendling, *Georgia Institute of Technology*; and Charles E. Dickerson, *University of Loughborough*, United Kingdom (**50**, 5, p. 1564) Full Paper

C13-160 Fracture Analysis of a Curvilinearly Stiffener Panel Subjected to Multiple Combined Loadings. Mohammad M. Islam and Rakesh K. Kapania, *Virginia Polytechnic Institute and State University* (**50**, 5, p. 1576) Full Paper

C13-161 Scaling Analysis of Propeller-Driven Aircraft for Mars Exploration. Tianshu Liu, *Western Michigan University*; and Akira Oyama and Kozo Fujii, *Institute of Space and Astronautical Science, Japan Aerospace Exploration Agency*, Japan (**50**, 5, p. 1593) Full Paper

C13-162 Flight and Wind-Tunnel Tests of Closed-Loop Active Flow Control. Rudibert King, Notger Heinz, Matthias Bauer, Thomas Grund, and Wolfgang Nitsche, *Technische Universität Berlin*, Germany (**50**, 5, p. 1605) Full Paper based on AIAA Paper 2012-2801

C13-163 Drag Prediction Workshop 4 Results Using Different Grids Including Near-Field/Far-Field Drag Analysis. Jan B. Vos and Stephane Sanchi, *CFS Engineering*, Switzerland; and Alain Gehri, *RUAG Aviation*, Switzerland (**50**, 5, p. 1615) Full Paper based on AIAA Paper 2010-4552

C13-164 Simulation of Flowfield Around a Ram-Air Personnel Parachute Canopy. A. Eslambolchi and H. Johari, *California State University* (**50**, 5, p. 1628) Full Paper based on AIAA Paper 2013-1281

C13-165 Underwing Missile Aerodynamic Effects on Flight-Measured Limit-Cycle Oscillations. Charles M. Denegri, James A. Dubben, and Sergey L. Kernazhitskiy, *U.S. Air Force SEEK EAGLE Office* (**50**, 5, p. 1637) Full Paper based on AIAA Paper 2007-1801

C13-166 Computations from the Fourth Drag Prediction Workshop Using the Edge Solver. Peter Eliasson, Shia-Hui Peng, and Lars Tysell, *Swedish Defence Research Agency (FOI)*, Sweden (**50**, 5, p. 1646) Full Paper based on AIAA Paper 2010-4548

C13-167 Dynamic Analysis of Three-Dimensional Semimonocoque Wing Structures. Tizzi Silvano, *University of Rome "La Sapienza"*, Italy (**50**, 5, p. 1656) Note

C13-168 Study on Powered-Parafoil Longitudinal Flight Performance with a Fast Estimation Model. Yang Hua, Song Lei, Liu Cheng, and Huang Jun, *Beihang University*, People's Republic of China (**50**, 5, p. 1660) Note

C13-169 Wind-Tunnel Investigation of a General-Aviation Differential Pressure Angle-of-Attack Probe. David F. Rogers, *U.S. Naval Academy* (**50**, 5, p. 1668) Note

C13-170 Longitudinal Linear Parameter Varying Modeling and Simulation of Morphing Aircraft. Ting Yue and Lixin Wang, *Beihang University, Beijing*, People's Republic of China; and Junqiang Ai, *First Aircraft Design Institute of AVIC*, People's Republic of China, 710089 (**50**, 6, p. 1673) Full Paper based on AIAA Paper 2009-6155

C13-171 Computations of High-Lift Wing Configuration on Unstructured Grids Using k-ω Models. Dasia A. Reyes and Sharath S. Girimaji, *Texas A&M University*; and Mohagna J. Pandya and Khaled S. Abdol-Hamid, *NASA Langley Research Center* (**50**, 6, p. 1682) Full Paper based on AIAA Paper 2011-868

C13-172 Flutter Prediction for Flight/Wind-Tunnel Flutter Test Under Atmospheric Turbulence Excitation. Jie Zeng, *ZONA Technology, Inc.*; and Sunil L. Kukreja, *NASA Dryden Flight Research Center, Edwards Air Force Base* (**50**, 6, p. 1696) Full Paper based on AIAA Paper

C13-173 Numerical Method for Fuzzy Reliability Analysis. Zhangchun Tang, Zhenzhou Lu, and Yanjun Xia, *Northwestern Polytechnical University*, People's Republic of China (**50**, 6, p. 1710) Full Paper

C13-174 Engine Placement Effect on Nonlinear Trim and Stability of Flying Wing Aircraft. Pezhman Mardanpour and Dewey H. Hodges, *Georgia Institute of Technology*; and Ryan Neuhart and Nathan Graybeal, *Bihrle Applied Research* (**50**, 6, p. 1716) Full Paper based on AIAA Paper 2012-1634

C13-175 Use of Relevance Vector Machine in Structural Reliability Analysis. Changcong Zhou and Zhenzhou Lu, *Northwestern Polytechnical University*, People's Republic of China; and Xiukai Yuan, *Xiamen University*, People's Republic of China (**50**, 6, p. 1726) Full Paper

C13-176 Experimental and Computational Modeling of the Kinematics and Aerodynamics of Flapping Wing. Sergey Shkarayev and Gunjan Maniar, *University of Arizona*; and Alexander V. Shekhovtsov, *National Academy of Sciences of Ukraine*, Ukraine (**50**, 6, p. 1734) Full Paper based on AIAA Paper

C13-177 Nonlinear Aeroelastic Formulation and Postflutter Analysis of Flexible High-Aspect-Ratio Wings. Andrea Arena and Walter Lacarbonara, *Sapienza University*, Italy; and Pier Marzocca, *Clarkson University*, New York 13676 (**50**, 6, p. 1748) Full Paper based on AIAA Paper

C13-178 High-Speed Hover-Capable Morphing Micro Air Vehicle. Jayant Sirohi, *University of Texas at Austin* (**50**, 6, p. 1765) Full Paper

C13-179 Hybrid Optimization Framework with Proper-Orthogonal-Decomposition-Based Order Reduction and Design-Space Evolution Scheme. Satyajit S. Ghoman, Zhicun Wang, and P. C. Chen, *ZONA Technology, Inc.*; and Rakesh K. Kapania, *Virginia Polytechnic Institute and State University* (**50**, 6, p. 1776) Full Paper based on AIAA Paper 2012-5631

C13-180 Stress Intensity Factor Solution for Cracks in Panels with Arbitrarily Located Stringers. Yan Bombardier, Min Liao, and Guillaume Renaud, *National Research Council Canada*, Canada (**50**, 6, p. 1787) Full Paper based on AIAA Paper 2012-1699

C13-181 Experimental Characterization of Lift on a Rigid Flapping Wing. Derrick Yeo, Ella M. Atkins, and Luis P. Bernal, *University of Michigan*; and Wei Shyy, *Hong Kong University of Science and Technology*, People's Republic of China (**50**, 6, p. 1806) Full Paper

C13-182 Far-Field Drag Decomposition Applied to the Drag Prediction Workshop 5 Cases. Martin Gariépy, Benoit Malouin, Jean-Yves Trépanier, and Éric Laurendeau, *École Polytechnique de Montréal*, Canada (**50**, 6, p. 1822) Full Paper based on AIAA Paper 2013-2507

C13-183 Upset Dynamics of an Airliner Model: A Nonlinear Bifurcation Analysis. Stephen J. Gill, Mark H. Lowenberg, and Simon A. Neild, *University of Bristol*, United Kingdom; Bernd Krauskopf, *University of Auckland*, New Zealand; Guilhem Puyou, *Airbus France*, France; and Etienne Coetzee, *Airbus Operations*, United Kingdom (**50**, 6, p. 1832) Full Paper based on AIAA Paper 2012-4648

C13-184 Investigation of Poststall Pitch Oscillations of an Aircraft Wind-Tunnel Model. J. Pattinson and M. H. Lowenberg, *University of Bristol*, United Kingdom; and M. G. Goman, *De Montfort University*, United Kingdom (**50**, 6, p. 1843) Full Paper based on AIAA Paper 2011-6526

C13-185 Bow Wave Effect in Aerial Refueling: Computational Analysis and Modeling. Atilla Dogan, *University of Texas at Arlington*; and William Blake, and Christian Haag, *U.S. Air Force Research Laboratory* (**50**, 6, p. 1856) Full Paper based on AIAA Paper

C13-186 Antiskid Braking Control with On/Off Valves for Aircraft Applications. Huang Cheng, Jiao Zongxia, and Shang Yaoxing, *Beihang University*, People's Republic of China; and Yao Jianyong, *Nanjing University of Science and Technology*, People's Republic of China (**50**, 6, p. 1869) Full Paper

C13-187 Damage Tolerance of FSWed Integral Wing Panel Reinforced by Bonded Crack Retarders. Yu E Ma and Hai-Wei Hu, *Northwestern Polytechnical University*, People's Republic of China; and Phil Irving, *Cranfield University*, United Kingdom (**50**, 6, p. 1880) Full Paper

C13-188 Scaling of Lift Degradation Due to Antiicing Fluids. Andy P. Broeren, *NASA John H. Glenn Research Center at Lewis Field*; and James T. Riley, *Federal Aviation Administration* (**50**, 6, p. 1886) Full Paper based on AIAA Paper 2012-2800

C13-189 Helicopter Harsh Landing Events: A Computational Hybrid Methodology to Estimate Fuselage Damage. G. Vallone, A. Manes, C. Sbarufatti, and M. Giglio, *Politecnico di Milano* (**50**, 6, p. 1896) Full Paper

C13-190 Effects of Freeplay on Dynamic Stability of an Aircraft Main Landing Gear. C. Howcroft, M. Lowenberg, and S. Neild, *University of Bristol*, United Kingdom; and B. Krauskopf, *University of Auckland*, New Zealand (**50**, 6, p. 1908) Full Paper based on AIAA Paper 2012-4730

C13-191 Benefits of Precision Scheduling and Spacing for Arrival Operations. Shannon J. Zelinski, *NASA Ames Research Center* (**50**, 6, p. 1923) Full Paper

C13-192 Global Sonic Boom Overpressure Variation from Seasonal Temperature, Pressure, and Density Gradients. Hiroshi Yamashita and Shigeru Obayashi, *Tohoku University*, Japan (**50**, 6, p. 1933) Note based on AIAA Paper 2010-1389

C13-193 Wake Effects on Aeroelastic Stability of Hingeless and Bearingless Rotors. Min-Soo Jeong and In Lee, *Korea Advanced Institute of Science and Technology*, Republic of Korea; Seung-Jae Yoo, *Hyundai Heavy Industries Company, Ltd.*, Republic of Korea; and Chul Yong Yun and Deog-Kwan Kim, *Korea Aerospace Research Institute*, Republic of Korea (**50**, 6, p. 1939) Note
